## EXHIBITS

<u>EXHIBIT</u>	<u>DESCRIPTION</u>
EXHIBIT BJF-1	AEPSC Charges to PSO Included In Cost of Service by Functional Organization
EXHIBIT BJF-2	AEPSC Charges to PSO by Functional Organization, Work Order, and Activity
EXHIBIT BJF-3	Proforma Adjustments to Affiliate Billings
EXHIBIT BJF-4	Affiliate Services Provided to PSO by AEPSC
EXHIBIT BJF-5	Description of AEPSC Billing Controls
EXHIBIT BJF-6	AEPSC Billing to PSO December 2020
EXHIBIT BJF-7	Benefiting Locations
EXHIBIT BJF-8	AEPSC Allocation Factor Definitions

1 I. INTRODUCTION

2 Q. WOULD YOU PLEASE STATE YOUR NAME, POSITION IN THE COMPANY, AND  
3 BUSINESS ADDRESS?

4 A. My name is Brian J. Frantz. My business address is 1 Riverside Plaza, Columbus, Ohio  
5 43215. I am currently Director, Corporate Accounting, for American Electric Power  
6 Service Corporation (AEPSC), a wholly-owned subsidiary of American Electric Power  
7 Company, Inc. (AEP).

8 Q. WOULD YOU BRIEFLY DESCRIBE YOUR EDUCATIONAL AND PROFESSIONAL  
9 BACKGROUND?

10 A. I attended Ohio University and received a Bachelor of Business Administration degree,  
11 with an emphasis in Accounting in 1999. I have been employed by AEPSC since March  
12 2005, when I was hired as a Staff Accountant in the Wholesale Commodity Accounting  
13 group. In May 2010, I was promoted to Supervisor of the Fuel and Contract Accounting  
14 group. In August 2013, I was promoted to Administrator of Regulated Accounting. In  
15 December 2013, I was promoted to Manager Regulated Accounting where I was  
16 responsible for the books and records for four operating companies (Indiana Michigan  
17 Power Company, Kentucky Power Company, Kingsport Power Company and AEP  
18 Generating Company). In November 2014, I became Manager Regulated Accounting,  
19 where I was responsible for AEPSC, until being promoted to my current position of  
20 Director in December 2018. Prior to my employment with AEP, I spent approximately  
21 one year in a financial reporting role and five years in various roles in public accounting.

1 Q. WHAT ARE YOUR CURRENT RESPONSIBILITIES?

2 A. I am responsible for maintaining the accounting books and records, and regulatory  
3 reporting for AEPSC. I am also responsible for AEPSC's monthly service billings to its  
4 affiliates. My responsibilities for AEPSC also include compliance with the Federal Energy  
5 Regulatory Commission's (FERC) Uniform System of Accounts accounting and reporting  
6 requirements.

7 Q. HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY BEFORE THIS OR ANY  
8 OTHER REGULATORY COMMISSION?

9 A. Yes, I have testified before the Corporation Commission of the State of Oklahoma (OCC)  
10 in Cause No. PUD 201500208. In addition, I submitted written testimony with the OCC  
11 in Cause Nos. PUD 201700151 and PUD 201800097, and with the Public Utility  
12 Commission of Texas (Commission) in numerous Dockets.

13 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

14 A. I address several areas in my testimony, including:

- 15 • An overview of the affiliate costs included in Public Service Company of  
16 Oklahoma's (PSO or Company) test year results;
- 17 • An explanation of how AEPSC is organized to provide services to PSO and other  
18 affiliates;
- 19 • An overview of the management oversight and quality assurance controls in place  
20 to ensure that affiliate billings properly reflect the cost of providing the service to  
21 each affiliate;
- 22 • A discussion of the external oversight of AEPSC accounting and billing processes;
- 23 • A discussion of AEPSC's use of benchmarking and market comparison data to  
24 ensure services provided to PSO and other affiliate companies are done effectively  
25 and efficiently;
- 26 • A discussion of the AEPSC billing process for the services provided by AEPSC to  
27 PSO and the other affiliates; and

- An overview of the types of affiliate services provided to PSO by affiliates other than AEPSC.

Q. PLEASE SUMMARIZE YOUR TESTIMONY.

A. The PSO cost of service amount presented in this filing includes \$64,770,638 of affiliate costs, which represents 16.1 percent of the total operations and maintenance (O&M) requested in this case. AEPSC accounts for \$59,298,868 of these costs and \$5,471,770 represents the amount PSO was billed from other affiliates. The AEPSC costs have been adjusted to develop a normal, ongoing level of costs billed to PSO.

AEPSC is a wholly-owned subsidiary of AEP and is the centralized service company providing, at cost, various professional support services for PSO and the other AEP affiliates. Using the service company to provide these support services allows the operating companies to concentrate their efforts on serving the immediate needs of their customers, while common processes can be performed in a centralized manner to promote efficiency and cost savings. The primary service company centers are located in Columbus, Ohio and Tulsa, Oklahoma. These two locations employ approximately 40% of the AEPSC employees, including over 600 in the state of Oklahoma.

AEPSC uses both benchmarking and outsourcing studies, where available and practical to do so, to review the cost of the products and services that are provided to affiliates, including PSO. AEPSC also employs many levels of oversight to ensure that its costs are billed accurately. This management oversight and controls includes, but is not limited to, internal AEPSC budget and actual cost reviews; and monthly review of the AEPSC bill by the affiliate companies. A copy of the December 2020, AEPSC billing rendered to PSO is provided in EXHIBIT BJF-6.

1           The costs incurred by AEPSC and billed to PSO are necessary for PSO's operations  
2           and benefit its customers by enabling PSO to meet service obligations in an efficient, cost-  
3           effective manner.

4   Q.   DO YOU SPONSOR ANY WORKPAPERS IN THE RATE FILING PACKAGE?

5   A.   Yes. I sponsor W/P P-1, Consolidated Companies and Subsidiaries Balance Sheet; W/P  
6       P-2, Income Statements for the Test Year and First Preceding Year; W/P P-3, Cost  
7       Allocation Basis; W/P P-4, Affiliate/Subsidiary General Data; W/P P-5,  
8       Affiliate/Subsidiary Contracts; W/P P-7, Services/Products from Affiliates/Subsidiaries;  
9       and W/P P-8, Services/Products to Affiliates/Subsidiaries.

10  Q.   WHAT EXHIBITS DO YOU SPONSOR?

11  A.   I sponsor EXHIBITs BJF-1, AEPSC Charges to PSO Included In Cost of Service by  
12       Functional Organization; BJF-2, AEPSC Charges to PSO by Functional Organization,  
13       Work Order, and Activity; BJF-3, Proforma Adjustments to Affiliate Billings; BJF-4,  
14       Affiliate Services Provided to PSO by AEPSC; BJF-5, Description of AEPSC Billing  
15       Controls; BJF-6, AEPSC Billing to PSO March 2018; BJF-7, Benefiting Locations; and  
16       BJF-8, AEPSC Allocation Factor Definitions.

17                                   II. OVERVIEW OF PSO'S AFFILIATE CASE

18  Q.   WOULD YOU PLEASE DESCRIBE THE AFFILIATE COSTS REQUESTED BY THE  
19       COMPANY?

20  A.   As shown on schedule W/P P-7, the PSO cost of service amount presented in this filing  
21       includes \$64,770,638 of affiliate costs. AEPSC accounts for \$59,298,868 of these costs,  
22       which are summarized on EXHIBIT BJF-1, with a more detailed view on EXHIBIT BJF-

1           2. PSO has included \$5,471,770 billed from other affiliates in cost of service. These other  
2           affiliate costs are detailed on schedule W/P P-7 and are discussed later in my testimony.

3   Q.   HOW DOES THE \$64.8 MILLION OF AFFILIATE EXPENSE INCLUDED IN THIS  
4           PROCEEDING RELATE TO THE TOTAL EXPENSES FOR PSO?

5   A.   PSO's total company O&M expense as shown on Schedule H of the filing package is  
6           \$401.7 million, and the \$64.8 million of affiliate costs included in that number represents  
7           16.1 percent of the total O&M requested in this case. The remaining 83.9 percent is  
8           incurred directly by PSO and not through an affiliate.

9   Q.   HOW DO THE COSTS BILLED FROM AEP AFFILIATES (INCLUDING AEPSC) IN  
10          THIS PROCEEDING COMPARE TO THOSE IN CAUSE NO. PUD 201800097?

11   A.   The total costs billed from AEP affiliates (including AEPSC) to PSO in cost of service is  
12          comparable (decreased by approximately \$0.4 million or approximately 1 percent) to the  
13          costs in Cause No. PUD 201800097, which was PSO's last base rate case.

14   Q.   HAVE ANY ADJUSTMENTS BEEN MADE TO THE TEST YEAR BILLINGS FROM  
15          AEPSC PRESENTED IN THE RATE FILING PACKAGE?

16   A.   Yes. The AEPSC costs have been adjusted to develop a normal, ongoing level of costs  
17          billed to PSO. The adjustments made to AEPSC billings are similar in nature to the PSO  
18          adjustments discussed in detail by Company witness Heather Whitney.

19   Q.   PLEASE DESCRIBE THE PROFORMA ADJUSTMENTS YOU HAVE MADE TO  
20          PSO'S TEST YEAR AFFILIATE COSTS.

21   A.   I have made seven proforma adjustments that decrease PSO's test year affiliate costs by  
22          \$3,856,961. Those adjustments are to:

- 1           1.     Adjust invoices or line-item charges through review of individual charges to PSO  
2           – increase of \$264,995;
- 3           2.     Normalize the amount of annual incentive compensation paid to employees to  
4           target level. Company witness Andy Carlin discusses the Company’s annual  
5           incentive compensation program – decrease of \$2,327,063;
- 6           3.     Normalize the amount of long-term incentive compensation paid to employees to  
7           target level. Company witness Andy Carlin discusses the Company’s long-term  
8           incentive compensation program – decrease of \$871,884;
- 9           4.     Normalize the amount of payroll to a test-year end level. Company witness Andy  
10          Carlin discusses the Company’s compensation program – decrease of \$807,195;
- 11          5.     Remove corporate aviation charges – decrease of \$266,039;
- 12          6.     Adjust the test year benefit plan costs for pension and other post-employment  
13          benefits (Statement of Financial Accounting Standards (SFAS) 106 and SFAS 112)  
14          to a 2021 level, per current actuarial studies/estimates – increase of \$179,316;
- 15          7.     Adjust the AEPSC internal support “overhead loading” charge to reflect the net  
16          decrease in requested costs per the proforma adjustments above – decrease of  
17          \$29,091.

18                   Each of these adjustments, with the calculation and description of the adjustment,  
19                   is contained in EXHIBIT BJF-3.

20    Q.     HAVE THERE BEEN ANY ORGANIZATIONAL CHANGES SINCE CAUSE  
21           NO. PUD 201800097?

22    A.     Yes. While there have been no material changes in the services provided by AEPSC  
23           departments to PSO, there has been a change in the organizational reporting structure of  
24           some of the departments. The new reporting structure is discussed in more detail later in  
25           my testimony.

26

1 III. SERVICE COMPANY ORGANIZATION

2 Q. WHAT IS AEPSC?

3 A. AEPSC is a wholly-owned subsidiary of AEP and is the centralized service company for  
4 the AEP System. AEPSC provides services primarily to AEP's utility companies (utility  
5 affiliates). AEPSC performs, at cost, various professional support services for PSO and  
6 the other AEP affiliates. EXHIBIT BJF-1 summarizes these services by functional  
7 organization. Of the approximately 16,800 employees of the AEP System, approximately  
8 6,300 were employed by AEPSC at the end of the test year.

9 Q. WHAT IS THE PRIMARY MISSION OF AEPSC?

10 A. AEPSC was established first and foremost to provide services to the utility affiliates. The  
11 utility affiliates are the primary subsidiaries of AEP. Since there are similar utility affiliates  
12 that all require the same or similar services, these companies' operations present the  
13 greatest opportunity to achieve economies of scale through provision of centralized AEPSC  
14 services. In addition, AEPSC provides service to several regulated transmission-only  
15 companies (Transcos) and AEP's transmission joint ventures, as well as AEP's non-utility  
16 subsidiaries.

17 Q. WHAT IS THE NATURE AND EXTENT OF AEPSC'S SERVICES FOR AEP NON-  
18 UTILITY SUBSIDIARIES?

19 A. Of the approximately \$80 billion of assets owned by AEP, approximately 90 percent are  
20 regulated utility affiliate assets. AEP's primary non-utility companies are the AEP  
21 Generation and Marketing organization consisting of competitive generating assets, a  
22 wholesale energy trading and marketing business and a retail supply and energy  
23 management business. The non-utility companies are charged for specific services

1 provided to them by AEPSC, and they are included in the corporate allocation factors for  
2 items such as payroll, benefits, accounting, auditing, and other corporate management  
3 allocations, where appropriate. AEPSC also bills the parent corporation for services  
4 provided to it such as shareholder support and strategic planning.

5 Q. PLEASE DESCRIBE HOW AEPSC IS ORGANIZED.

6 A. AEPSC is functionally organized into the following areas of services: (1) External Affairs,  
7 which includes customer operations, corporate communications, and regulatory services;  
8 (2) Chief Administrative Officer, which includes real estate and workplace services and  
9 corporate human resources; (3) Generation, which includes regulated generating assets,  
10 engineering services, regulated commercial operations, project and construction services,  
11 environmental and safety, and business services; (4) Chief Financial Officer, which  
12 includes corporate accounting, corporate planning and budgeting, treasury, finance,  
13 investor relations, risk management services, supply chain, procurement and fleet services;  
14 (5) Energy Delivery, which includes transmission field services, transmission grid  
15 development, and corporate safety and health; (6) Energy Supply; (7) Utilities; and (8)  
16 Chief Executive Officer, which includes the AEP Chairman and his staff, audit services,  
17 information technology, telecommunications, and legal services.

18 Q. DO ALL OF THESE FUNCTIONS PROVIDE SERVICES TO PSO?

19 A. All of these areas provide services to PSO, with the exception of Energy Supply, whose  
20 primary responsibility is to serve the Generation & Marketing segment of AEP. The  
21 amounts billed by each of the functions listed above are shown on EXHIBIT BJF-1, and  
22 those functions are described in greater detail on EXHIBIT BJF-4, as well as in the Direct

1       Testimony of Company witnesses Steven F. Baker, Daryll Jackson and Wayman L. Smith  
2       filed in this case.

3   Q.   WHERE ARE THE AEPSC EMPLOYEES WHO PERFORM SERVICES FOR PSO  
4       AND THE OTHER AFFILIATES LOCATED?

5   A.   The primary service company centers are located in Columbus, Ohio; Canton, Ohio; and  
6       Tulsa, Oklahoma. These three locations employ approximately half of the AEPSC  
7       employees, including approximately 600 in the state of Oklahoma. AEPSC employees are  
8       also located throughout the areas of the AEP affiliates. Since many of the services provided  
9       are centralized to reduce the number of personnel needed and reduce the costs to provide  
10      those services, activities may be provided from any of several locations. For example,  
11      AEPSC has numerous customer service call centers where customer calls for all AEP  
12      utilities are answered. Any of these centers, one of which is located in Oklahoma, will  
13      back up other call centers when call volume is high to efficiently service customer calls  
14      and to reduce the number of customer service representatives necessary to support any one  
15      company.

16  Q.   ARE THERE ADVANTAGES THAT RESULT FROM PSO'S RECEIPT OF  
17       CENTRALIZED SUPPORT SERVICES?

18  A.   Yes. AEPSC has evolved over the years to provide services in areas where economies can  
19      be produced through a common knowledge and provision of services using shared systems,  
20      such as the customer accounting and billing, property, payroll, accounting and other  
21      systems. It also achieves economies through standardized processes being performed by  
22      one system-wide department, such as the payment of invoices or the provision of  
23      engineering studies for new facilities. Using the service company to provide these services

1 allows the operating companies to concentrate their efforts on serving the immediate needs  
2 of their customers, while common processes can be performed in a centralized manner to  
3 promote efficiency and cost savings.

4 Q. ARE THE COSTS INCURRED BY AEPSC FOR WHICH PSO IS BILLED  
5 NECESSARY TO THE COMPANY'S OPERATION?

6 A. Yes, as described throughout my testimony and supporting exhibits, the costs incurred by  
7 AEPSC and billed to PSO are necessary for PSO's operations and benefit its customers by  
8 enabling PSO to meet service obligations in an efficient, cost-effective manner. The  
9 performance of many of these functions by AEPSC increases efficiency by eliminating the  
10 need for each operating company to maintain staff and resources to perform the services  
11 separately. Thus, the relationship that PSO enjoys with AEPSC is of substantial benefit to  
12 PSO and its customers.

13 IV. MANAGEMENT AND REGULATORY OVERSIGHT OF AEPSC

14 Q. WHAT MANAGEMENT OVERSIGHT AND CONTROLS EXIST TO ENSURE AEPSC  
15 COSTS ARE APPROPRIATELY BILLED TO THE PROPER AFFILIATE?

16 A. AEPSC employs many levels of oversight to ensure that its costs are billed accurately. The  
17 management oversight and controls can be divided into three main categories: (1)  
18 accounting system controls, which ensure that the accounting systems are operating  
19 correctly and that the mechanical processing is accurate; (2) management oversight,  
20 including review of departmental charges to budgets, variance explanations, and review of  
21 the monthly AEPSC bill; and (3) audit and reporting oversight, which incorporates the  
22 internal and external audits performed on AEPSC as well as state and federal regulatory  
23 reporting requirements. Each of these areas is discussed in detail on EXHIBIT BJF-5.

1 Q. PLEASE REVIEW THE ACCOUNTING SYSTEM CONTROLS.

2 A. The accounting system controls include the following:

- 3 • Transaction validation where the accounting information is validated as to its  
4 accuracy at the point of entry;
- 5 • Mechanical reviews, which test the mechanics of the system to ensure the system  
6 is operating as expected; and
- 7 • Variance review, which is performed to understand the reasons for increases or  
8 decreases in total AEPSC costs for the month.

9 Q. PLEASE DISCUSS THE MANAGEMENT OVERSIGHT OF AEPSC CHARGES.

10 A. Management oversight of the AEPSC bill consists primarily of:

- 11 • Internal AEPSC budget and actual cost reviews; and
- 12 • Monthly review of the AEPSC bill by affiliate companies. A copy of the December  
13 2020 AEPSC billing rendered to PSO is provided in EXHIBIT BJF-6.

14 Q. WHO IS RESPONSIBLE FOR THE EXTERNAL OVERSIGHT AND REGULATION  
15 OF AEPSC'S OPERATIONS AND BILLINGS?

16 A. FERC is responsible for the oversight and regulation of AEPSC under the Public Utility  
17 Holding Company Act (PUHCA) of 2005. The OCC, in proceedings such as these, also  
18 reviews charges from AEPSC to PSO. In addition, the other state commissions review  
19 charges from AEPSC in similar proceedings or through various filing requirements.

20 Q. PLEASE DISCUSS THE EXTERNAL AUDIT AND REPORTING OVERSIGHT OF  
21 THE AEPSC BILLING PROCESS.

22 A. AEPSC is subject to numerous audit and reporting requirements, both as a member of the  
23 AEP Corporation for financial reporting, and as a requirement of federal and state  
24 jurisdictions. These requirements include:

- 1           •       Annual AEP independent audit by PricewaterhouseCoopers LLP;
- 2           •       Audit required under the 16 Tex. Admin. Code (TAC) § 25.272, "Code of Conduct
- 3               for Electric Utilities and Their Affiliates," filed every three years, showing compliance
- 4               with the Texas affiliate code of conduct;
- 5           •       Annual "Report of Affiliate Activities" filed with the Public Utility Commission of
- 6               Texas;
- 7           •       Annual Affiliate Activities report filed with the Virginia State Corporation
- 8               Commission;
- 9           •       FERC Form 60 which is the annual report of AEPSC financials and allocations;
- 10          •       Maintenance of an AEPSC Cost Allocation Manual, which documents AEPSC's cost
- 11               allocation methodologies and accounting procedures and which is required by the
- 12               states of Kentucky, Ohio, Oklahoma and Arkansas; and
- 13          •       Periodic audits of AEPSC accounting and billing procedures conducted by FERC
- 14               staff.

15   Q.     DOES THE FERC REVIEW AEPSC BILLING PROCEDURES AND ALLOCATION

16           METHODOLOGIES?

17   A.     Yes. On an annual basis, FERC requires the filing of FERC Form No. 60, "Annual Report

18           of Centralized Service Companies." In addition, the FERC completed an audit of AEP

19           affiliate transactions in 2019. The focus of this audit was AEPSC billing and allocation

20           processes, as well as compliance with the FERC chart of accounts, FERC Form 60

21           requirements, and record retention requirements.

#### 22                           V. THE AEPSC ACCOUNTING AND BILLING PROCESS

23   Q.     HOW IS THE ACCOUNTING FOR AEPSC CHARGES PERFORMED?

24   A.     AEPSC uses a work order accounting system to identify and bill each service performed

25           for affiliate companies. For each service performed by AEPSC, three questions are key:

26           1. WHO should be billed for the service?

27           2. HOW should the service be billed?

1                   3. WHAT service was provided?

2                   AEPSC's accounting and billing systems were developed to bill affiliates based on  
3 these basic elements. The primary accounting codes which determine how AEPSC costs  
4 are billed, and which I discuss in detail below, are:

- 5                   • Benefiting Location (tells *who* to bill)
- 6                   • Allocation Factor (tells *how* to bill)
- 7                   • Work Order/Activity Code (tells *what* service was provided)

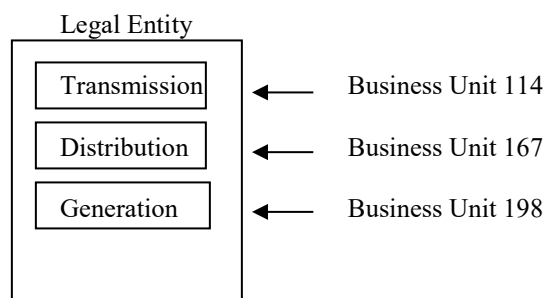

8                                   1. Benefiting Location (*Who* To Bill)

9   Q.   PLEASE DESCRIBE HOW THE AEP COMPANIES ARE STRUCTURED FOR  
10 REPORTING AND AEPSC BILLING.

11 A.   An understanding of how the AEP companies are structured for internal and external  
12 reporting is an important basic element in understanding how AEPSC costs are billed.

13                   Each utility company is subdivided into multiple "Business Units." For most  
14 utilities, these Business Units are Transmission, Distribution and Generation, like the  
15 example of PSO:

19                                   **Table 1**  
20                                   **PSO – Business Units**

*Source: EXHIBIT BJF-7*

PSO is a legal entity or corporation owning transmission, distribution and generation assets. When PSO files SEC or FERC financial statements, these statements are done on the legal entity basis—all Business Units combined. However, the records for PSO are separated into three Business Units as shown in the illustration above. This unbundling was done by all AEP utility subsidiaries in anticipation of the restructuring of the utility industry. AEPSC bills its affiliates by individual Business Unit.

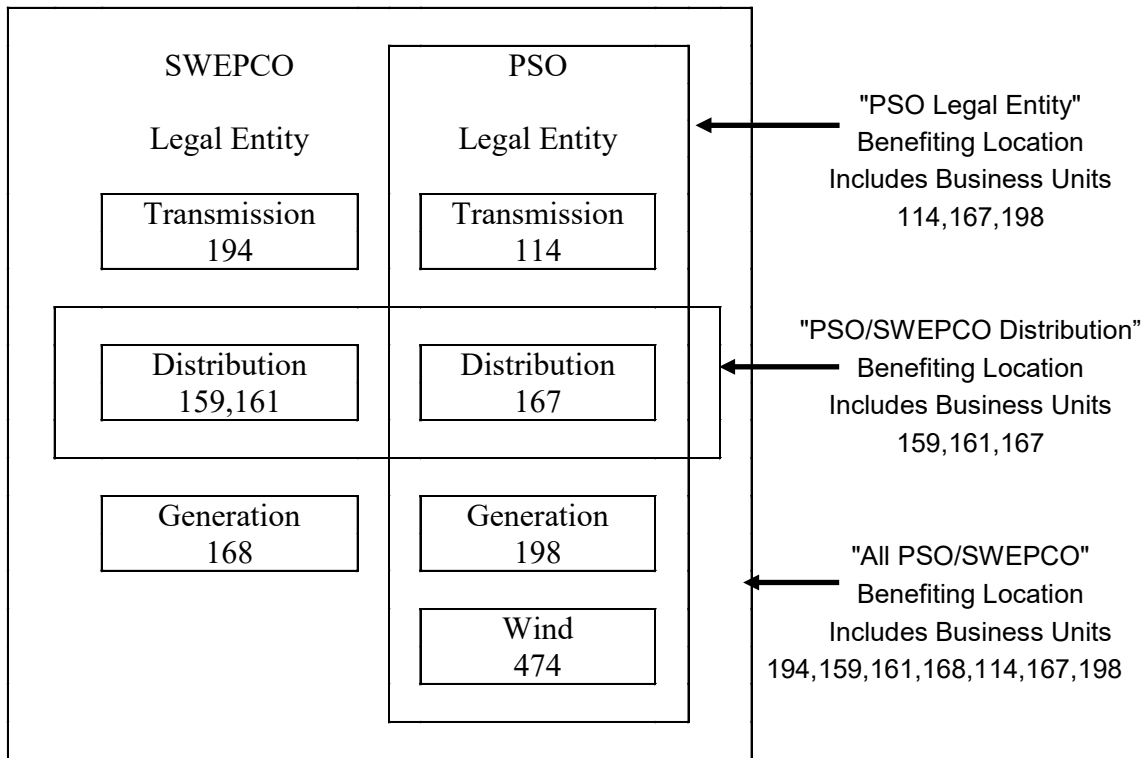

Q. PLEASE EXPLAIN HOW THE BUSINESS UNITS COMBINE TO FORM BENEFITING LOCATIONS.

A. A Benefiting Location is one or a combination of Business Units. The Benefiting Location can be one Business Unit, such as PSO Transmission only, or it can be a combination of Business Units, such as the four PSO Business Units in the example above. Benefiting Locations are often combinations of “similar” or “regional” Business Units across multiple companies, such as all Distribution Business Units, all PSO Business Units, all Southwest Power Pool or ERCOT Transmission Business Units, etc. Below is an example of how various Business Units comprise a Benefiting Location.

1  
2

**Table 2**  
**Benefiting Location Example**

3  
4

Source: EXHIBIT BJF-7

5  
6  
7  
8  
9  
10  
11  
12  
13

As shown above, PSO and Southwestern Electric Power Company (SWEPCO) can combine to form numerous Benefiting Locations. By combining Business Units 114, 167, and 198, AEPSC creates a Benefiting Location to bill all PSO Business Units, or the entire PSO legal entity. A combination of Business Units 167, 159 and 161 creates a Benefiting Location to bill PSO and SWEPCO Distribution Business Units. Combining all Business Units in the table above would create a Benefiting Location that billed all Business Units in the PSO/SWEPCO region. When the cost of a particular service should be billed to more than one Business Unit, AEPSC uses these combinations of Business Units, called a *Benefiting Location*, to bill those costs.

1 Q. HOW ARE THE BENEFITING LOCATIONS CHOSEN TO BILL CHARGES TO THE  
2 APPROPRIATE COMPANIES?

3 A. An employee chooses the Benefiting Location through an appropriate Work Order for the  
4 work performed. Work Orders have a pre-established Benefiting Location and are  
5 discussed in more detail later in this section.

6 Q. PLEASE DESCRIBE THE BENEFITING LOCATIONS THAT INCLUDED PSO  
7 BUSINESS UNITS DURING THE TEST YEAR.

8 A. AEPSC used 107 different Benefiting Locations to bill services during the test year that  
9 included PSO Business Units. These Benefiting Locations, including a description of the  
10 Business Units included in each one, are attached to this testimony as EXHIBIT BJF-7.  
11 Benefiting Locations used in connection with billings to PSO during the test year included,  
12 for example, all Business Units within PSO, all generation companies within AEP, all  
13 distribution companies within AEP, and all transmission companies within AEP. Of the  
14 charges PSO received from AEPSC during the test year, approximately 30 percent of those  
15 charges were made to PSO Business Units only, or in effect, direct billed. No other  
16 companies were included in the allocation of those costs.

17 Q. IF A CHARGE IS ALLOCATED USING A BENEFITING LOCATION THAT  
18 INCLUDES MORE THAN ONE PSO BUSINESS UNIT, HOW CAN THAT BE  
19 CONSIDERED A "DIRECT" CHARGE?

20 A. Functional separation within a legal entity such as PSO does not equate to an allocation to  
21 that legal entity when each functionally separate Business Unit is billed. It is necessary to  
22 combine the Business Units within one company to determine the amount of charges that  
23 are directly billed versus allocated.

2. Allocation Factor (*How To Bill*)

Q. YOU STATED EARLIER THAT THE ALLOCATION FACTOR PROVIDES THE “HOW” OF THE BILLING PROCESS. PLEASE EXPLAIN.

A. Allocation Factors are mathematical formulas that are developed to provide fair and reasonable methods to allocate joint costs. Each charge made by AEPSC for a service provided has the Benefiting Location that determines *WHO* to bill, as I discussed earlier, and also has an Allocation Factor attached to it that determines *HOW* the charge should be divided among the Business Units receiving the service.

Q. WHAT ALLOCATION FACTORS ARE USED BY AEPSC TO BILL AFFILIATES?

A. EXHIBIT BJF-8 shows the Allocation Factors that were available to allocate costs to affiliates during the test year. AEPSC has 80 FERC-accepted Allocation Factors. Only 35 of the Allocation Factors were used for the costs billed to PSO during the test year since some of the Allocation Factors do not apply to PSO (i.e. hydro plant megawatt generating capability), and others have been discontinued. A chart showing the amounts billed by Allocation Factor is presented later in this section, as Table 3.

Q. GENERALLY DESCRIBE THE ALLOCATION FACTORS.

A. The Allocation Factors used to bill PSO for services performed by AEPSC are based upon statistics such as number of customers, number of employees, total assets, number of transmission pole miles, and other criteria as shown on EXHIBIT BJF-8. The data upon which these factors are based is updated, at a minimum, monthly, quarterly, semi-annually, or annually, depending on the particular basis. When a cost is allocated, the Allocation Factor is applied to the Business Units that make up the Benefiting Location that was

1 chosen for the billing. Thus, only those Business Units who benefit from the service are  
2 allocated their portion of the cost.

3 Q. WHAT TYPES OF CONSIDERATIONS GO INTO CHOOSING AN ALLOCATION  
4 FACTOR FOR A PARTICULAR WORK ORDER OR ACTIVITY?

5 A. A volume-driven factor is used in all cases where the cost driver is volume based and the  
6 data is available. For example, in allocating costs for processing accounts payable, each  
7 affiliate receiving the service is billed based on its relative percentage of the number of  
8 vendor invoice payments processed by AEPSC; for mailing customer bills, each affiliate's  
9 relative percentage of the total mailings is used.

10 If a Work Order does not have a direct volume-based cost driver, the most  
11 representative factor for the service provided is used. For example, for administering  
12 employee benefit plans, number of employees is used; for managing and dispatching the  
13 transmission system, number of transmission pole miles is used; and for financial reporting,  
14 total assets is used. The Allocation Factors are designed to ensure that the charges are in  
15 proportion to the benefits received by the benefiting companies.

16 Q. WHAT SHOULD BE THE OBJECTIVE OF AN ALLOCATION METHOD?

17 A. An allocation method should be used that allocates costs on a basis that reasonably relates  
18 the cost to the activity generating the cost. For example, when more activity generates  
19 more cost, an Allocation Factor which captures that characteristic provides a reasonable  
20 relationship between the dollars allocated and the demand for the service. The Allocation  
21 Factors should be applied consistently for similar services and should be reasonably stable  
22 over time. AEPSC's continued use of the approved Allocation Factors accomplishes these  
23 objectives.

1 Q. CAN ALL COSTS BE CHARGED DIRECTLY TO EACH COMPANY, INSTEAD OF  
2 ALLOCATED THROUGH A FACTOR?

3 A. No. While costs are directly billed to the extent practicable, costs jointly incurred on behalf  
4 of one or more affiliates must be allocated because the product or service provided is not  
5 reducible to discrete, easily divisible parts. For example, if an AEPSC distribution  
6 engineer were working on a standard substation design that will be used by all of the  
7 distribution companies in the AEP system, it would not be practical or possible to identify  
8 and direct bill discrete portions of the design to individual distribution Business Units. As  
9 a result, that engineer would bill the cost of that project to all distribution Business Units  
10 using a distribution-related Allocation Factor. If the AEPSC engineer prepared a separate  
11 drawing for each company to direct bill such services, it would be necessary to duplicate  
12 the staffing and resources used to provide the service for each affiliate using the service,  
13 thereby defeating the very purpose of having the service company.

14 Q. PLEASE SUMMARIZE THE AEPSC BILLINGS TO PSO DURING THE TEST YEAR  
15 BASED ON THE ALLOCATION FACTORS USED.

16 A. Table 3 shows the billings to PSO by Allocation Factor, and it indicates in the two columns  
17 whether that billing was: (a) charged to a combination of only PSO Business Units, such  
18 that the charge was in effect a direct bill to PSO; or (b) if it was allocated to PSO along  
19 with other AEP Business Units.

20 The table shows that approximately 30 percent of the total charges to PSO in Cost  
21 of Service accounts were directly billed to PSO Business Units.

Table 3  
AEPSC Charges to PSO

1 A. Generally speaking, a Work Order is an electronic file used as a means to accumulate  
2 charges into one grouping. The Work Order is the means to bring the Benefiting Location,  
3 Allocation Factor, and purpose for the work into one billable unit.

4 Q. PLEASE DESCRIBE HOW A WORK ORDER IS ESTABLISHED.

5 A. A Work Order can be requested by any employee who wishes to track costs for a specific  
6 project. The employee who requests a Work Order provides information to the AEPSC  
7 Accounting Department concerning the nature of the work to be performed and the  
8 Business Units that will be the beneficiaries of the service. The request is reviewed and  
9 approved by the manager of the requesting employee.

10 Using this information, the AEPSC Accounting Department assigns the Benefiting  
11 Location, which determines who will be billed for the work, as I described earlier in this  
12 testimony, and an Allocation Factor. The Allocation Factor is chosen to reflect the  
13 characteristic that most clearly drives the cost of the service—for example, number of  
14 customers or total assets. The majority of the AEPSC Work Orders receive final approval  
15 from my department. Some Work Orders are initiated through a field-based system and  
16 are reviewed after the fact.

17 Q. WHAT OTHER INFORMATION IS ACCUMULATED WITH THE WORK ORDER?

18 A. Accounting information such as the department which made the charge, an Activity Code  
19 that describes the type of service provided, the FERC account associated with the charge,  
20 a Cost Component that indicates the category of cost incurred (labor, etc.), and other codes  
21 used for reporting and analysis are captured in the accounting records. Accounting within  
22 each Work Order is in accordance with the FERC US of A.

1 Q. YOU MENTION ACTIVITY CODES. PLEASE EXPLAIN WHAT YOU MEAN BY  
2 THAT.

3 A. Activity Codes are used in conjunction with Work Orders and are another means of making  
4 the accounting selection process for employees more understandable and dynamic.

5 When an employee makes a charge, they select the Work Order as described above,  
6 and an Activity Code, to accomplish the billing. The Activity Code indicates, for all Work  
7 Orders, the business activity performed. This facilitates cost analyses. For certain Work  
8 Orders, the Activity Code is linked to the Allocation Factor that will be used to allocate the  
9 charges to the affiliates.

10 Employees choose the appropriate Activity using a hierarchal listing of activities  
11 that is available on-line to all employees in the company. This hierarchy allows “drill-  
12 down” into the activities that cover each area. For example, a screen-shot of the activities  
13 available for “Managing the Accounting & Finance” processes shows that eighteen  
14 activities are available in these areas:

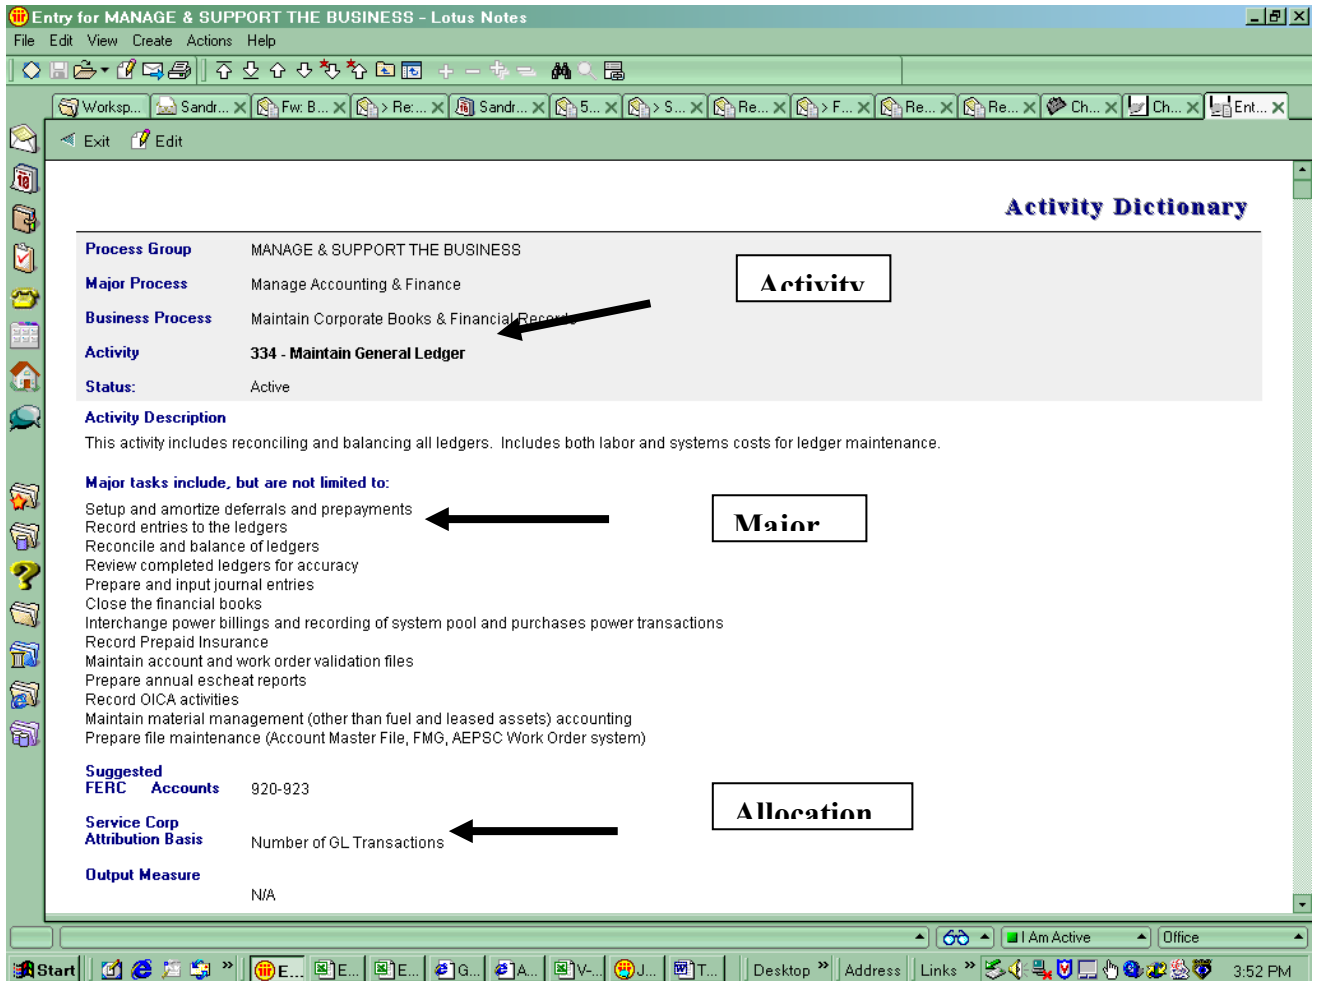

Table 4

Screen-shot of Activity Dictionary for Accounting and Finance Activities

Activity Dictionary			
		Activity	
	▼	<b>Manage Accounting &amp; Finance</b>	
	▼	<b>Prepare, Approve &amp; Review Budgets</b>	
		329 - Prepare Long Term Financial Plans	
		676 - Develop, Monitor & Analyze Budgets	
	▼	<b>Maintain Corporate Books &amp; Financial Records</b>	
		333 - Develop, Update & Administer Accounting Policies, Procedures & Instructions	
		334 - Maintain General Ledger	
		335 - Administer Lease & Rental Agreements	
		336 - PERF FUEL ACCOUNTING REG COS	
		974 - Provide for General Ledger Journal Expense (Identified Users Only)	
	▼	<b>Perform Tax Compliance/ Planning &amp; Reporting</b>	
		656 - Coordinate Tax Compliance	
		657 - Coordinate Tax Accounting & Regulatory Support Services	
		658 - Coordinate Tax Planning & Analysis	
	▼	<b>Manage Financial Resources</b>	
		621 - Manage Cash	
		661 - Manage & Participate in Corporate Financing	
		662 - Manage Trust & Investments	
		712 - Manage Short Term Funding	
		713 - Manage Factoring	
	▼	<b>Conduct Financial &amp; Regulatory Reporting</b>	
		355 - Prepare Internal Financial Reports & Studies	
		356 - PREP/FILE EXT/REG REPORTS REG	
	▼	<b>Account for Electric Plant Assets</b>	
		360 - Perform Owned Asset Accounting	

By accessing this on-line listing, employees can further review the details behind each Activity Code, to make sure that the activity is appropriate for the service they are providing. Using an Activity from Table 4 above, Activity 334 - Maintain General Ledger, an employee can drill-down further to see more details about that Activity, as is seen in the screen-shot in Table 5 below:

**Table 5**  
**Screen-shot of Activity 334 – Maintain General Ledger**

The screen-shot shows that an employee can further access information about major tasks that are appropriate to charge using the Activity, suggested FERC account usage, and the AEPSC Allocation Factor that may be used to bill the cost.

Q. WHAT TYPES OF QUALITY ASSURANCE PRACTICES ARE EMPLOYED IN THE INITIATION OF A WORK ORDER?

A. When a Work Order is initially requested, both the selection of the Benefiting Location and the assignment of the Allocation Factor are reviewed and approved by a manager for the work to be performed to ensure that it is properly assigned. In addition, my department

1 is responsible for approving all AEPSC Work Order requests, and we review and approve  
2 the Benefiting Location and Allocation Factor prior to the Work Order being activated by  
3 the AEPSC Accounting Department.

4 Q. HOW DOES THE WORK ORDER SYSTEM ENSURE THAT AEPSC'S CHARGES TO  
5 PSO ARE NO HIGHER THAN THE CHARGES TO OTHER AFFILIATES FOR THE  
6 SAME OR SIMILAR SERVICES, AND THAT THE CHARGES REASONABLY  
7 APPROXIMATE THE ACTUAL COST OF PROVIDING THE SERVICE TO PSO?

8 A. The AEPSC Work Order system was designed for the express purpose of meeting the  
9 SEC/FERC requirements to fairly allocate common charges among AEP affiliates, and to  
10 do so at cost. By using a Work Order system, the expenses for specific projects are  
11 identified and the Work Orders are assigned specific and approved Benefiting Locations  
12 and Allocation Factors. Common costs are allocated based on the factor that best matches  
13 the charge with the cost driver related to the service, and that same factor is applied to all  
14 companies in proportion to the benefit they received from the service. In this way, PSO  
15 and every other affiliate included in the Benefiting Location receiving a service is charged  
16 the same unit price—that is, its appropriate share of the actual cost of the service.  
17 Accordingly, the price charged to PSO for the service (AEPSC's actual cost) is no higher  
18 than the price charged to the other affiliates receiving the service (AEPSC's actual cost).

19 The costs for services benefiting only one company are directly assigned and are  
20 billed 100% to that company by the employee performing the service. Again, the price for  
21 all direct billings—actual cost—is the same for PSO and all other affiliates receiving direct  
22 billings.

1                                    VI. AFFILIATE BILLINGS FROM OTHER AEP AFFILIATES

2        Q.        DID PSO HAVE TRANSACTIONS WITH ANY AEP AFFILIATES OTHER THAN  
3                    AEPSC?

4        A.        Yes. PSO had transactions with various affiliate companies as shown on schedule W/P P-  
5                    7 of the filing package. These transactions total \$5,471,770. Test year payments by PSO  
6                    to affiliate companies (other than AEPSC) generally fall into two categories.

7                    The first category is service payments, where the affiliate provides a service such  
8                    as storm restoration work. Another example of this type of service billing is where PSO  
9                    may have a critical maintenance need and another affiliated company has the part or  
10                  expertise to perform that task. In those cases, PSO purchases the part or service from the  
11                  affiliate at their cost to expedite the repair. This type of cost is simply payment for services  
12                  rendered, much like the billings PSO receives from AEPSC.

13                  The second category is convenience payments of bills from third parties. In these  
14                  situations, the service to PSO is not provided by an affiliate. The affiliate receives an  
15                  invoice, the cost of which should be borne by more than one company. The affiliate makes  
16                  a payment to the vendor, and bills the other affiliates for their share. Similarly, there are  
17                  instances where PSO makes convenience payments on behalf of other AEP operating  
18                  companies and bills the other operating companies for their share of the bill.

19        Q.        HOW ARE INTER-COMPANY TRANSACTIONS BILLED BETWEEN THE  
20                    VARIOUS OPERATING COMPANIES?

21        A.        In general, transactions are directly billed from one operating company to another, or they  
22                    are billed to the appropriate operating company utilizing a similar billing process as that  
23                    used by AEPSC. As with AEPSC, expenditures are charged to work orders and are billed

1 to the company benefiting from the service. Costs benefiting one company are directly  
2 billed while costs that benefit more than one company are allocated. The result is that PSO  
3 is billed by the operating company supplying the service an amount based on the actual  
4 cost to provide that service.

5 Q. DID PSO PROVIDE SERVICES TO ANY AFFILIATES DURING THE TEST YEAR?

6 A. Yes, PSO has affiliate transactions classified under the same two categories as mentioned  
7 above. These amounts are shown on W/P P-8.

**PUBLIC SERVICE COMPANY OF OKLAHOMA  
AEPSC CHARGES TO PSO INCLUDED IN COST OF SERVICE

**PUBLIC SERVICE COMPANY OF OKLAHOMA  
ADJUST AEPSC INTERNAL SUPPORT  
FOR THE TEST YEAR ENDED DECEMBER 31, 2020  
PRO-FORMA NO. 7**

Line No.	Description	FERC Account Number	Pro Forma Adjustment
1	Internal Support Adjustment	9230	\$ (29,091)

**Calculation**

A - PSO Per Books	\$ 63,047,497
B - PSO Total Pro-Forma (before Internal Support)	<u>\$ (3,719,539)</u>
C - Ratio (B/A)	-5.90%
D - Total Internal Support	<u>\$ 493,103</u>
E - Internal Support Adjustment (C*D)	<u><u>\$ (29,091)</u></u>

**PURPOSE**

**To decrease AEPSC internal support billed to PSO by the ratio of AEPSC related pro-forma's to the per books AEPSC billing to PSO.**

**AFFILIATE SERVICES PROVIDED TO PSO BY AEPSC**

AEPSC provided services to PSO during the test year in all functional areas as follows:

- a. External Affairs;
- b. Chief Administrative Officer;
- c. Generation;
- d. Chief Financial Officer;
- e. Energy Delivery;
- f. Energy Supply;
- g. Utilities; and
- h. Chief Executive Officer.

**EXTERNAL AFFAIRS**

The External Affairs group provides services in the areas of customer and distribution services, regulatory services, corporate communications, and federal affairs.

Distribution Services provides business unit support, including business case development, business requirements definition, user acceptance testing, and problem resolution for distribution information systems applications such as outage management and work management systems that support all operating companies. They also are responsible for distribution system planning, distribution reliability strategy, automated distribution grid management

1 technology deployment, forestry operations, and network engineering, emergency  
2 restoration planning and distribution standards. Distribution Services is  
3 responsible for the evaluation of promising advanced technologies at AEP's Dolan  
4 Technology Center and Walnut Test Facility and handles system-wide geographic  
5 information system (GIS) mapping.

6 Customer Operations is responsible for performing retail customer billing,  
7 customer data management, and call center services on behalf of the operating  
8 companies. AEPSC has five virtually integrated Customer Operations Centers  
9 (COCs) that are strategically located throughout AEP's service territories. The  
10 COC employees process inbound customer calls and internet inquiries from the  
11 Company's internet site and take the appropriate action to respond to all customer  
12 service inquiries including credit-related functions, outage reporting, customer  
13 complaint resolution, and customer hazardous conditions. This group also  
14 supports system-wide credit and collection services, such as bankruptcy filings,  
15 low income assistance processing, collection calls, and payment processing.

16 The COCs are responsible for responding to telephone requests and  
17 issuing the appropriate orders to fulfill those requests. COC also receives move-  
18 in requests and issues orders to field employees to complete those requests.  
19 Outage and hazard calls are accepted from all customers.

20 The "home" COC for PSO is located in Tulsa, Oklahoma. Calls to the  
21 COC are first routed to the customer's "home" COC and then, if necessary, to the  
22 next available agent in one of the five other centers. While each COC is equipped

1 to handle its regional customers' calls, linking each COC together allows AEPSC  
2 to use a greater number of resources to process customer calls. For example, if a  
3 PSO customer calls and all Tulsa customer solutions associates are currently  
4 engaged in customer calls, an available associate in another AEPSC COC is ready  
5 and able to assist that customer because of the technology deployed by AEPSC  
6 and the training provided to all associates. This also allows for much better  
7 response time during spikes in call demand such as after a major storm.  
8 Customers can communicate their needs with an AEPSC COC 24 hours a day,  
9 seven days a week. Thus, AEPSC can utilize available resources to provide better  
10 customer service and keep costs down.

11 Customer Services Support provides central support for customer and  
12 revenue-related programs and systems. This group is responsible for providing  
13 user support services for the Customer Information System, performing special  
14 billing for large commercial/industrial customers, and managing third party  
15 distribution and pole attachments business relationships, including billing and  
16 collections for Other Accounts Receivable (OAR). Program support includes  
17 energy efficiency and demand response and evaluation, load research analytics,  
18 and support of customer service representatives and engineers.

19 Meter Systems & Repair Services is responsible for meter engineering,  
20 including home area network technology evaluation, meter operations support,  
21 equipment repair, and meter labs. The group interrogates meters to capture  
22 interval data for billing and load research purposes. This group is also responsible

1 for the four Repair Shops located across the AEP System, which provides cost  
2 effective refurbishment of distribution equipment, management of distribution  
3 tools, and testing of distribution equipment.

4 Economic & Business Development is responsible for supporting state,  
5 regional, and community economic development activities that will enhance the  
6 growth and development of the communities within AEP's service territory.  
7 Activities include marketing our territory to companies considering new  
8 manufacturing investment, working to support our national account customers  
9 looking to expand their activities in the AEP system, and preparing our  
10 communities for development opportunities. One example of community  
11 development is our data center certification initiative whereby we systematically  
12 identified and produced detailed engineering prospectuses on viable locations  
13 across our service area for data centers who are both large and 'steady' users of  
14 electricity.

15 The Regulatory Services group consists of Regulatory Pricing and  
16 Analysis, Regulatory Case Management, and Technology Business Development  
17 services. This group is responsible for preparation of cost-of-service studies, rate  
18 design studies, special contracts and pricing, and tariff filing support for the  
19 AEPSC utility affiliates. This area is also responsible for the preparation and  
20 support of filings before the various state commissions under whose jurisdiction  
21 AEP or its subsidiaries provide service, as well as the FERC. In addition, this  
22 group develops business strategies to help AEP better anticipate and meet the

1 evolving needs and expectations of its regulated utility customers. The RTO &  
2 NERC Regulatory Compliance Team is also part of the Regulatory Services  
3 organization. This group supports the development and/or coordination of  
4 policies on RTOs and legislative issues, as well as analyzing current/proposed  
5 legislation.

6 Corporate Communications manages and coordinates communications  
7 between AEP and its many internal and external customers. Corporate  
8 Communications primarily provides services in the areas of media relations  
9 support, employee communication support, public safety messaging,  
10 employee/contact safety messaging, advertising/sponsorship services, educational  
11 programming, customer communication support, project liaison services linking  
12 central business units with operating subsidiaries, community relations support,  
13 video production services, internal and external web design, graphic design,  
14 administration of contributions and memberships, policy communication support,  
15 and social media monitoring and management.

16 Federal/External Affairs provides federal governmental affairs support to  
17 PSO and AEP's other affiliates. In addition, it monitors and participates in  
18 rulemakings and other public policy discussions at various federal agencies, such  
19 as the FERC and the Department of Energy. These services ensure that PSO is  
20 apprised of national legislative and regulatory developments and to assess the  
21 impact of such developments on PSO and its customers, enabling PSO to comply  
22 with resulting federal laws and regulations.

1

2                                   **CHIEF ADMINISTRATIVE OFFICER**

3                   The Chief Administrative Officer organization encompasses the Human  
4                   Resources and Real Estate and Workplace Services divisions.

5                   Human Resources' (HR) primary responsibility is to attract, retain, and  
6                   support a diverse and qualified workforce to facilitate the multi-faceted work  
7                   responsibilities required to provide utility service to customers. HR employees  
8                   are located at both local and corporate levels. HR employees at the local level  
9                   provide day-to-day HR support including the hiring and training of both PSO and  
10                  AEPSC employees at their location. Centralized HR employees focus on  
11                  particular areas of HR expertise, such as benefit plan design and administration  
12                  and payroll processing for all AEP employees. By providing certain services on a  
13                  centralized basis, AEPSC is able to combine the economies of corporate scale  
14                  with the customization and focus associated with a decentralized model. The  
15                  Human Resources organization includes Employee Relations, Talent  
16                  Management, and Total Rewards (Benefits and Compensations).

17                  Human Resources Employee Relations provides localized strategic  
18                  consultation and support in all areas of employee relations, including employee  
19                  counseling and conflict resolution, investigations resulting from allegations of  
20                  employee misconduct, disciplinary actions, flexible work arrangements, diversity  
21                  activities, workforce planning, HR communications, community service,  
22                  outplacement, severance, compliance and reporting, and labor relations.

1           Talent Management includes design, development, and administration of  
2           leadership programs and processes designed to enhance leadership effectiveness,  
3           team performance and employee engagement. It also provides development for  
4           new supervisors and resources to enhance skills of existing leaders. This group  
5           also provides consultation and support in broader areas of talent management,  
6           including performance management, team development, organization  
7           effectiveness, and succession planning.

8           Total Rewards services include design, development, management and  
9           administration of all benefits and compensation programs, including  
10          compensation, health and welfare benefits, retirement pension and 401(k), payroll  
11          administration, work/life balance and wellness programs, and statutory benefits  
12          (FMLA, long-term disability and workers' compensation).

13          Real Estate and Workplace Services provides services in two broad  
14          categories. Real Estate Asset Management services include:

- 15               • Purchase and acquisition of land and buildings;
- 16               • Management of property acquisitions and disposal;
- 17               • Leasing of office space or property from others;
- 18               • Management and maintenance of real estate records and payment of  
19               fees, including management of easement grants and licensee  
20               agreements;
- 21               • Property inspections;

- Negotiation and provision of necessary documents required for the removal, relocation or closure of public roads, or other facilities as may be necessary for construction of Company facilities; and
- Management of land held for future use, forestlands and other land management initiatives as may be required.

Workplace Services involves the operation and maintenance of office and service center facilities, including repairs, maintenance, and grounds care. They perform facility design, engineering, estimating and contracting for new workspace. For existing workspace, they provide furniture, layout planning, and remodeling. This group also provides office relocation services.

Additionally, Workplace Services provides property management services, including:

- Print and high speed copy services; mail and supply services; administration of national contracts for office supplies, toner, paper and third-party courier services; provision and maintenance of office equipment such as copier equipment and printers;
- Provision of audio/visual equipment; and
- Travel and meeting event planning services.

### **GENERATION**

The Generation function at AEPSC primarily consists of: fossil and hydro generation services; engineering services; projects and construction services;

1 regulated commercial operations; environmental & safety; and generation  
2 business services.

3 Fossil and Hydro Generation organization is involved directly in the  
4 operation and maintenance of the power plants in each of the operating companies  
5 owned by AEP. This group is comprised of the operating company vice  
6 presidents and managing directors of Generation and the following subgroups:  
7 Performance Improvement, Coal Combustion Residual Management, Field and  
8 Support Services, and Operations and Mining. The operating company vice  
9 presidents operate as an interface between the operating company and the  
10 Generation Fossil and Hydro organization.

11 Engineering Services is responsible for the engineering and planning of  
12 larger capital projects at the power plants, and is comprised of the following  
13 groups: Electrical Engineering, Quality Assurance Services, Civil Engineering &  
14 Geotechnical Services, New Technology Development & Policy Support, Project  
15 Engineering & Work Control, Plant Engineering & Compliance Programs, and  
16 Mechanical Engineering. The Engineering Services organization is tasked with  
17 the responsibility for new unit design criteria and the design and engineering of  
18 proposed changes to existing power plant equipment and systems. This group  
19 also maintains design basis information for the plants, and establishes and  
20 communicates technical recommendations and requirements to all of the plants  
21 across the system. This organization is typically responsible for projects costing  
22 more than \$750,000, but less than \$5,000,000.

1                   Projects and Construction Services provides project management and  
2                   execution services for large capital projects – those projects greater than  
3                   \$5,000,000 in total cost. The organization manages these projects by tracking  
4                   costs, procurement, and construction activities to ensure successful execution of  
5                   large capital additions.

6                   Regulated Commercial Operations is responsible for coordinating the  
7                   dispatch of AEP's generation fleet and to engage in bulk power market activity, in  
8                   accordance with the principles described in the West Operating Agreement. In  
9                   providing services to PSO, the Commercial Operations Group is structured  
10                  around five core functions: (1) Market Operations, (2) Commercial Operations  
11                  Support, (3) Energy Marketing and Renewables, (4) Commercial and Financial  
12                  Analysis, and (5) Fuel Procurement.

13                  The Environmental & Safety function provides permitting and compliance  
14                  support, guidance, procedures, recommendations and training for AEP's operating  
15                  companies in order to maintain and improve their environmental programs and  
16                  enhance compliance with environmental laws, regulations, and policies. This  
17                  group is also involved in the development process for environmental regulations,  
18                  coordinating with other groups within AEP as well as with PSO and other  
19                  operating companies as applicable. Environmental & Safety supports AEP's  
20                  corporate strategies and values concerning the environment.

21                  Generation Business Services is tasked with providing financial analyses,  
22                  business planning, and contract administration at the corporate level within the

1       Generation Organization. This group, along with PSO, is also responsible for  
2       assisting in the determination of projected useful plant lives.

3  
4                                   **CHIEF FINANCIAL OFFICER**

5       The Chief Financial Officer organization within AEPSC provide corporate  
6       accounting, tax research and consultation, planning and budgeting, risk  
7       management, cash management, treasury, investor relations services, supply  
8       chain, procurement, and fleet services.

9               The utility affiliates do not have stand-alone accounting departments.  
10       Accounting for the companies is performed by AEPSC. The accounting for PSO  
11       is performed in Tulsa, Oklahoma, and Columbus and Canton, Ohio.

12               Corporate Accounting Services maintain the books and records of PSO,  
13       preparing monthly entries to the ledgers, and developing and maintaining the  
14       accounting and business systems that support PSO. Additional accounting  
15       services provided include preparing FERC, state and Securities and Exchange  
16       Commission (SEC) financial reports, and the preparation and filing of the  
17       consolidated financial statements. Services provided also include ensuring  
18       compliance with Generally Accepted Accounting Principles (GAAP) and  
19       corporate accounting policy, and monitoring SEC and Financial Accounting  
20       Standards Board (FASB) rulemaking activities. Accounting also provides  
21       regulatory accounting support and reporting, customer accounting, accounts

1 receivable, accounts payable, property accounting and cash remittance processing  
2 services to all utility affiliates.

3 Tax Services provide services to PSO and the other AEPSC utility  
4 affiliates in both state and federal tax areas, including the preparation and filing of  
5 all income tax returns and the administration of Internal Revenue Service (IRS),  
6 state and local examinations, protests and appeals. The AEPSC tax department  
7 also prepares and files all state and local tax returns, such as gross receipts,  
8 franchise, property and sales tax. Also provided are federal and state tax planning  
9 and payment forecasting and the monitoring of federal and state tax legislation  
10 and rulemaking activities.

11 Planning and Budgeting provides long and short-range planning services  
12 (including services related to forecasting), strategic planning and analyses, and  
13 budget variance analyses. Financial planning provides support for a computerized  
14 financial model used to develop long-term projections and other resource  
15 planning. The financial forecasts are provided to rating agencies to assist in the  
16 evaluation of credit quality and are distributed to security analysts. The forecasts  
17 also provide data needed for regulatory reviews and other filings. Additionally,  
18 the Planning and Budgeting group manages and participates in various process  
19 improvement projects.

20 Risk Management services pertain to financial risk management and the  
21 provision of insurance services to affiliated companies.

1           The financial risk management services include developing and  
2           monitoring systems that track the level of financial risk inherent in company  
3           transactions and evaluating financial options.

4           AEPSC's insurance services include the procurement of insurance  
5           programs to protect AEP and all of its operating companies and business units  
6           from the financial risk of accidental losses and administers the services necessary  
7           to support that task. These programs include but are not limited to property,  
8           workers' compensation, casualty, and directors and officers insurance. Insurance  
9           services also include adjusting claims made against the company for third-party  
10          bodily injury and property damage and first-party property damage and recovery  
11          on claims from damage to AEP property by outside parties.

12          Cash Management provides service related to the operation of the  
13          Corporate Borrowing Program (CBP). In addition to managing the CBP,  
14          AEPSC's Corporate Finance staff also conducts all financing activity for PSO and  
15          the other AEP companies, including AEP, Inc. This financing activity includes  
16          the issuance of debt, equity or hybrid securities, as well as coordinating project  
17          financings. It also includes all activities related to financings such as maintaining  
18          relationships with financial institutions and rating agencies, negotiating business  
19          terms for financing agreements, providing documentation required by financial  
20          institutions and governmental agencies such as the SEC and state regulatory  
21          agencies, ongoing monitoring of capital markets, financial modeling, analyzing  
22          financing alternatives, and preparing and filing with the SEC documents required

1 by the Securities Act of 1933 and the Securities Exchange Act of 1934. This  
2 group also manages the day-to-day cash needs of PSO and the other AEP  
3 affiliates to ensure that the use of or investment of cash assets is maximized daily.

4 The Treasury group manages the investments for the AEP system's  
5 employee benefit plans. These plans, including the retirement savings plan, cash  
6 balance retirement plan, employees' life insurance plan and the disability income  
7 plan, have assets in external trust accounts. In addition, the Treasury staff keeps  
8 current on the regulatory requirements of the Department of Labor and the IRS  
9 for employee benefit funds covered under the Employee Retirement Income  
10 Security Act.

11 Investor Relations provides present and potential investors with an  
12 accurate portrayal of each AEP company's financial performance and related  
13 financial data, including PSO. The investor relations function provides support  
14 fundamental to attracting and maintaining investor capital. The Investor  
15 Relations department provides disclosure and dissemination of information about  
16 the Company through formal presentations, telephone conversations with  
17 investors and Wall Street analysts, and face-to-face meetings with investors.

18 Supply Chain, Procurement and Fleet Operations (SCPFO) is primarily  
19 comprised of three groups: Supply Chain and Fleet Operations provides  
20 warehousing and inventory management services to supply the required material  
21 for construction and maintenance activities necessary for PSO's generation,  
22 transmission, and distribution operations. This group also provides vehicle

1 acquisition and maintenance activities for PSO. The Procurement team negotiates  
2 contracts that are used to obtain goods and services that are primarily identified  
3 by PSO. The Supply Chain Center of Excellence provides an overall support  
4 structure for the SCPFO functions. This includes measurement tools for SCPFO  
5 metrics and benchmarking, programs and systems support, and reporting.  
6 Additional services include maintenance and standardization of the AEP material  
7 catalog as well as management of the asset recovery process.

### 8 **ENERGY DELIVERY**

9  
10 The Energy Delivery organization, in conjunction with PSO leadership,  
11 operates and manages the PSO transmission system as part of its responsibility to  
12 manage the overall AEP transmission system. It consists primarily of these  
13 departments: Controls and Field Services, Grid Development, and Transmission  
14 Asset Strategy & Policy. The AEP Transmission system assets are planned,  
15 engineered, constructed, operated and maintained through the coordinated efforts  
16 of the Energy Delivery organization. In addition, the Corporate Safety and Health  
17 group reports up through the Energy Delivery organization.

18 Transmission Controls and Field Services is the service provider for field  
19 operations, maintenance, and emergency restoration of the AEP transmission  
20 system. In addition, Transmission Field Services provides internal labor  
21 resources for implementation of transmission capital projects. This group is also  
22 responsible for providing transmission project financial controls.

1           Grid Development is the organization that is responsible for, including but  
2           not limited to, transmission planning, engineering, project management,  
3           operations, technology development, and for providing support to the Energy  
4           Delivery organization by ensuring compliance with reliability standards and  
5           requirements established by North American Electric Reliability Corporation,  
6           regional reliability organizations, and state regulatory agencies, and developing  
7           and executing transmission strategy and business development plans.

8           Transmission Asset Strategy and Policy organization is responsible for  
9           Transmission financial oversight and reporting and the oversight of all  
10          transmission policy and regulatory matters involving Regional Transmission  
11          Organizations, the Federal Energy Regulatory Commission, and State regulators  
12          affecting transmission. It also provides the regulatory support for the AEP  
13          transmission-only companies, and siting and Right-Of-Way for transmission  
14          projects.

15          Corporate Safety and Health organization provides support in all areas of  
16          occupational safety and health, public and contractor safety, industrial hygiene,  
17          ergonomics, health and wellness, and training. This group ensures that the  
18          AEPSC Safety and Health policies and procedures with in AEP's operating  
19          companies, such as PSO, are aligned with AEP's corporate AEPSC Safety and  
20          Health policies and procedures as well as federal standards from agencies such as  
21          the Occupational Safety and Health Administration.

The Energy Supply group is primarily responsible for coordinating the dispatch of AEP's competitive generation fleet and engages in marketing, risk management and retail activities in ERCOT, PJM, SPP and MISO.

Performance Management is responsible for providing consistent reporting, analysis, and peer benchmarking for the operating companies on key operational measures in the distribution and customer services businesses. These include areas of focus such as safety, reliability, workforce productivity, customer satisfaction, and customer delinquency/uncollectible. The team also provides financial budget and business case expertise/analysis support to the operating companies. Lastly, the group provides project management and/or facilitation support to large strategic projects that cross multiple operating companies.

Transmission Business Operations Programs is responsible for process improvement, performance management, and portfolio management.

The Chief Executive Officer consists not only of the AEP Chairman and Chief Executive Officer (CEO) Nicholas Akins, and his administrative staff, but also Legal, and Audit services.

1           The Chief Executive Officer provides overall strategy, direction and  
2 management to PSO and all other companies in the AEP System, and includes the  
3 Chairman/CEO of AEP and his staff. Additionally, this group manages corporate  
4 initiatives for the benefit of all companies, provides support to the AEP Board of  
5 Directors, and participates in organizations to promote or resolve industry issues.

6           Legal services include legal activities related to corporate finance and  
7 compliance, environmental and safety requirements, labor law and relations,  
8 litigation, real estate, tax, and federal and state regulatory filings. Legal is also  
9 responsible for the hiring and oversight of external legal counsel.

10           Regulated public utilities must comply with all applicable federal and state  
11 laws, rules, and regulatory requirements. Legal provides coordinated, centralized  
12 services to PSO and AEPSC's other utility affiliates that are essential to carry out  
13 these corporate governance responsibilities.

14           Audit Services reports directly to the CEO of AEP and has a direct  
15 reporting responsibility to the Chairman of the Audit Committee of the Board of  
16 Directors. It provides audit and review services to assist management and the  
17 Board of Directors in effectively establishing, maintaining, and overseeing a  
18 proper internal control environment. This group also has key responsibilities in  
19 the management and implementation of the Sarbanes-Oxley Act for the AEP  
20 System's compliance with the Act, including PSO. This includes managing and  
21 tracking of the AEP system controls matrix. As a result of Sarbanes, the  
22 Company was required to implement a new system to track all accounting and

1 management controls, the testing of the controls, and the results of the testing.  
2 This department also provides the workflow for the preparation and review of  
3 Sarbanes testing requirements.

4 Information Technology (IT) enables AEP's business success through  
5 effective and efficient information and operations management tools and services.  
6 IT provides the AEP Operating Companies with cost-effective information,  
7 operations, and telecommunications equipment and services, as well as security to  
8 enable the AEP Operating Companies to fulfill their mission of providing safe and  
9 reliable electric service to their customers.

10 In the course of providing service to customers, PSO employees and  
11 contractors depend on many computerized information and communications  
12 systems, along with security services, which are all provided and supported by the  
13 IT organization. For example, in the event of a power outage to customers, PSO  
14 customer service representatives use automated systems to help answer customer  
15 calls, identify affected customers, record information related to the affected  
16 premises and communicate customer information to distribution system  
17 dispatchers.

18 Distribution field employees use mobile computers (via 800 MHz radio) to  
19 receive work orders from dispatchers for daily work and storm restoration. The  
20 system is used to communicate with the dispatchers regarding new or changed  
21 orders, estimated time of completion or restoration, and any unique material needs  
22 or requests for additional assistance. The work orders flow through AEP's

1 integrated 800 MHZ radio system to help provide timely and accurate  
2 communication and service to dispatchers and customers. The radio system is  
3 also used for vehicle/ Global Positioning System (GPS) assistance, and provides  
4 voice communications for 10,000 AEP employees, including PSO employees.

5 PSO field construction staff also use computerized systems for  
6 engineering, managing and scheduling construction and maintenance work, and  
7 for purchasing materials and managing inventory needed for transmission and  
8 distribution construction work. Operations employees use automated systems to  
9 monitor and control the real-time status of the PSO transmission and distribution  
10 networks. Other employees use automated systems to support accurate and timely  
11 billing for services, to maintain electronic maps of PSO transmission, distribution,  
12 and generation networks, and to maintain employee and financial records for  
13 PSO.

14 PSO employees, operations, and intellectual property are protected from  
15 cyber threats by the AEP security services team that works in collaboration with  
16 IT.

17 Given the scope, scale and complexity of their operations and their heavy  
18 dependence on information and operations technology systems and services, the  
19 AEP Operating Companies and their customers benefit from the reasonable cost,  
20 secure,

21 The Demand Management team is responsible for defining and  
22 maintaining the portfolio and investment plans of all IT solutions required to run a

1 business unit's and an operating company's operations. The team is responsible  
2 for aligning business unit strategic plans with technology strategic plans,  
3 governance and prioritization of projects, and managing short- and long-term  
4 financial plans.

5 The Business Applications team develops software based on defined  
6 requirements and specifications to meet the generation, transmission, distribution,  
7 customer service and corporate functional needs of the company. The costs  
8 associated with this function are labor and labor-related, and are mainly accounted  
9 as capital investments. Additional capital charges may be incurred for licenses  
10 for acquired business application software and software development tools.

11 The application support team within Business Applications performs  
12 proactive and reactive application support activities to ensure effective operations  
13 of the applications. In the event of an application failure, the support team  
14 collaborates with the Infrastructure & Operations and Telecommunications teams  
15 to perform root cause analysis and remediation. In addition to the labor and  
16 labor-related costs for the staff, application support also includes the annual  
17 maintenance charges for purchased business application software.

18 The Infrastructure & Operations team deploys cost-effective infrastructure  
19 solutions to enable the delivery of business applications. The team supports all of  
20 the computing and storage platforms in AEP's primary and backup data centers.  
21 The Service Desk team provides primary and secondary (more complex) support

1 for individual computing devices, hardware and software, and 24x7 monitoring of  
2 AEP's IT infrastructure.

3 The Enterprise Architecture team is responsible for defining and  
4 maintaining the technology product standards of all information and operations  
5 technology solutions required to run the business units and operating companies.  
6 The team's scope includes technology governance, technology research, and  
7 review of the portfolio's obsolete technologies to establish remediation plans.

8 The Cornerstone team is responsible for implementing the Cornerstone  
9 Program, the ten-year initiative to renew large corporate enterprise systems.

10 The Processes & Methods team supports successful delivery of IT  
11 processes and projects. The team measures and monitors project delivery metrics  
12 for improvement opportunities, and manages project methodologies and the  
13 enabling software applications. The team also supports development of project  
14 manager skills and competencies within the IT organization. In addition, the team  
15 ensures effective and efficient execution of daily IT processes.

16 The IT Business Office team provides financial analysis and support to  
17 help manage IT's budget, IT safety coordination and support, telecommunications  
18 material management, work release/invoice processing, administrative assistance  
19 to the IT management team, and software asset management for all of AEP.

20 The Cyber Risk and Security Services team collaborates with the IT  
21 organization to secure all AEP data and applications. In partnership with AEP's  
22 business partner staff, this team maintains the security and confidentiality of

1 AEP's business and customer data, responds swiftly to cyber security events,  
2 develops efficient and sustainable cyber security standards and architecture, tests  
3 the effectiveness of cyber security protections, tests the organization's response in  
4 the event of a cyber-attack, and promotes the security awareness and compliance  
5 culture within AEP.

6 Telecommunications implements and supports a network that is available  
7 24x7 to provide access to applications, e-mail, data, internet, Supervisory Control  
8 and Data Acquisition, radio, telephone and wireless services. This includes all  
9 local area networks (LAN) and wide area networks (WAN) (excluding LANs in  
10 substations).

## **Public Service Company of Oklahoma Description of AEPSC Billing Controls**

American Electric Power Service Corporation's (AEPSC) work order and billing system has various internal controls as discussed below. The controls and administrative procedures include responsibility, work order processing, billing system controls, pre-billing review, allocation, budgeting, time-reporting review and approval, billing review, dispute resolution, internal auditing, external auditing, state affiliate audits, and governmental audits and reporting (SEC and FERC).

The primary goals of these controls and procedures are to correctly bill AEPSC's affiliates, at cost, and using the appropriate allocation factors.

### **RESPONSIBILITIES**

The business units and groups who code and approve transactions for processing through the AEPSC billing system are responsible for ensuring the appropriate accounting is used to bill the charges. Employees can access electronic databases that contain titles and descriptions of all applicable accounting. An online database is readily assessable to employees to assist with the proper classification of accounting transactions. The primary ChartFields (Accounting coding blocks) are discussed in W/P P-3.

The Accounting and Corporate Planning and Budgeting groups also assist AEPSC's affiliate companies in evaluating the monthly billing. Also see "Billing Review" below.

### **WORK ORDER PROCESSING REVIEW**

Accounting reviews requests for new AEPSC Work Orders. The review includes:

- Appropriate descriptions - to assure users will understand the type of costs to be accumulated in each work order.
- Logical benefiting locations - to assure the proper affiliate company or group of companies will be billed.
- Logical billing allocation factor - to verify (based on the work being performed) that appropriate cost drivers are being used for the type of service being performed such as Number of Employees, Transmission Pole Miles, Generating Capability, or Total Assets.

### **BILLING SYSTEM CONTROLS**

Specific controls related to the billing system include:

- Accounting reviews the reasonableness of the statistics, by Affiliate Company, that are used to allocate sharable costs by comparing them to other statistics, amounts used in prior periods, etc.
- Reports are generated by the billing system to reconcile/confirm all amounts were allocated and the total dollars received for processing were billed out.
- The billing system generates an automatic email to Accounting identifying any errors or non-billable transactions, if any, or states there were no errors.

## **Public Service Company of Oklahoma Description of AEPSC Billing Controls**

- Accounting confirms the AEPSC net income is zero each month-end as a further control that all its expenses incurred were billed.
- Accounting reviews the list of AEP affiliate companies every month to assure billing statistics are accumulated and posted properly for newly created affiliate companies, or removed for inactivated affiliate companies.

Please see Exhibit BJT-8 for information regarding the billing allocation factors that were used by AEPSC to bill PSO and their update frequency.

### **PRE-BILLING TRANSACTIONS REVIEW**

Various controls exist surrounding the detailed accounting transactions that are processed by the AEPSC billing system, including:

- Numerous edits/validations are performed mechanically at the time transactions are entered into the accounting system. For example, the validation routines will not permit a labor FERC expense Account to be used in conjunction with non-labor costs.
- Prior to running the monthly AEPSC billing process, Accounting reviews certain accounting transactions to ascertain if any items are misclassified based on certain criteria. Correcting entries are prepared, if necessary, prior to the bill processing. For example, transactions charged to income tax FERC expense accounts should be charged to the income tax work order.
- An “unbillable” report is run numerous times prior to the final processing of the bill. This report identifies transactions that will not bill due to recently inactivated Work Orders, invalid combinations of statistics, etc. Correcting entries are made as necessary prior to running the final bill.

### **ALLOCATION**

Shared costs are billed using approved allocation factors. The billing system is designed to result in a fair and equitable allocation of cost among all affiliate companies. As mentioned above under “Responsibilities”, information is readily available to employees to assist with the proper coding of transactions in order to achieve these results relative to their areas of responsibility.

### **BUDGETING**

Each year AEPSC prepares an annual budget for the services it will provide during the next calendar year. The budgets are prepared by each AEPSC department.

Corporate Planning & Budgeting and Business Unit Budget Coordinators generate monthly performance reports that compare actual cost against the budget. Performance results can be viewed by Department, by Account, or by Activity, and also by Affiliate Company.

AEPSC’s managers are primarily responsible for analyzing and explaining cost variances incurred while performing their work. Additionally, AEPSC and its affiliates are jointly

## **Public Service Company of Oklahoma Description of AEPSC Billing Controls**

responsible for analyzing and explaining the cost variances incurred. AEP's Board of Directors, with the assistance of executive management, approves the annual budgets for AEPSC, the regulated utility companies and all other AEP affiliates.

### **TIME REPORTING REVIEW AND APPROVAL**

AEPSC uses positive time reporting whereby time records are submitted by each AEPSC employee, on a bi-weekly basis. Supervisors, or their designated delegates, review and approve the time records for the employees in their respective groups.

In addition to the normal approval process, in 2009, Corporate Accounting began a periodic review of select departments in the organization. The report indicated the companies that each employee billed, the work performed for that company, the labor hours charged, and the work order(s) used to bill the hours. This attestation report provided additional assurance to confirm managers are performing expected time report reviews. Managers were required to sign the attestation report and return the signed copy to Accounting. If a manager had questions about an employee's time charges, or believed a correction was required, the manager communicated those concerns to Accounting.

### **BILLING REVIEW**

The monthly AEPSC billings to the affiliate operating companies are submitted to the AEP state Business Operations Support staff for their review and approval. Monthly, operating company staff reviews the AEPSC departments allocating costs to their companies to determine whether it appears reasonable for each department to be allocating to that operating company. Also monthly, operating company staff notify AEPSC of their approval of the monthly AEPSC billing, noting any issues needing resolved as a result of their monthly review.

### **INTERNAL AUDITING**

The AEPSC Audit Services department performs an audit of the AEPSC billing system on a recurring basis. The purpose of the audits is to examine the internal controls over the billing process and to ascertain that billing allocations are being performed in accordance with the approved allocation factors and that the allocations result in appropriate charges to affiliates.

### **EXTERNAL AUDITING**

Annually, AEPSC is subject to an audit by an outside auditing firm, Price Waterhouse Coopers, as part of the overall AEP audit engagement. This audit includes an audit of various transactions through the billing system to verify accuracy of the procedures and amounts billed to affiliates.

## **Public Service Company of Oklahoma Description of AEPSC Billing Controls**

### **FERC AUDITS AND REPORTING**

#### **FERC Audits:**

Effective with the passage of the Public Utility Holding Company Act of 2005 (which became effective February 6, 2006), AEPSC is now regulated by the Federal Energy Regulatory Commission, and as such is subject to FERC oversight and audit. The FERC completed an audit of AEP's affiliate transactions from AEPSC in 2019.

#### **FERC Reporting:**

The FERC requires an annual report, called the FERC Form 60, which AEPSC files annually by May 1 for the preceding calendar year. This report contains detailed AEPSC information, including amounts billed to each affiliate company.

These periodic audits and annual reporting requirements provide additional controls governing AEPSC's accounting routines, financial transactions, and billings to affiliates.

### **COST ALLOCATION MANUAL**

State commissions in Ohio, Kentucky, Oklahoma, and Arkansas require that AEP maintain a detailed cost allocation manual, discussing the allocation methodologies to affiliates, the services provided, and the affiliate rules under which AEPSC must operate. This manual is updated every six months.

# ***AEP Service Corporation Billing Summary***

## PSO\_INT\_CONSOL

**December 2020**

**Total AEPSC Bill \$12,807,193**

**Capital**

**December 2020**

**Total AEPSC Bill \$5,825,457**

Billed From Department...	Actuals Billed	Budget Billed	Variance
11991R Generation	\$760,569	\$361,316	\$399,253

### AEP Service Corporation Actuals Billed by Function

**Public Service Company of Oklahoma**  
**Benefiting Locations**  
**For the Test Year Ended December 31, 2020**

A Benefiting Location is one or a combination of Business Units. The Benefiting Location can be one Business Unit, such as PSO Transmission only, or it can be a combination of Business Units, such as the three PSO Business Units. Benefiting Locations are often combinations of “similar” or “regional” Business Units across multiple companies, such as all Distribution Business Units, all PSO Business Units, all Southwest Power Pool (SPP) or Electric Reliability Council of Texas (ERCOT) Transmission Business Units, etc. For any service that is performed for more than one Business Unit, AEPSC uses these combinations of Business Units, called *Benefiting Locations*, to bill the costs.

Number of Benefiting Locations including PSO Business Units	107
---	-----

- See Pages 2 & 3 for a listing of these 107 Benefiting Locations
- See Pages 4-27 for a listing of each Business Unit included in each of these 107 benefiting locations

Number of Benefiting Locations not including PSO Business Units	<u>538</u>
---	------------

Total Benefiting Locations	645
----------------------------	-----
