OG&E GUARANTEED FLATBILL RATE - IMPORTANT TERMS AND CONDITIONS

- . By choosing to participate in OG&E's Guaranteed FlatBill (GFB) rate plan, you agree to pay the monthly GFB amount for electric service to the designated address shown on the reverse side for the 12-month contract period, beginning with your next monthly electric service bill.
- . Subject to other applicable laws and regulations, your participation in the GFB rate plan will continue automatically until you withdraw or cease to be eligible for the plan (for example, if your service is disconnected for non-payment). Before the end of each 12-month period, OG&E will notify you of the new monthly GFB amount for the next 12-month period. At the end of each 12-month period, you may notify OG&E of your decision to withdraw from this plan, in which case you will not be required to pay any additional amount in connection with the plan. Unless notified otherwise, OG&E will continue to bill you on this plan, but at the new monthly GFB amount.
- . If at any time before the end of the 12-month contract period, you cease receiving electric service at the designated address (for example, you move from the address or the electric service at this address is disconnected), or you otherwise withdraw or are withdrawn from the GFB rate plan, you will be required to pay any additional charges. Specifically, if the amount of electricity actually used results in a billing amount under the standard rate that is greater than the amount for which you have been billed under this plan, you must pay the difference.
- . You will not receive any refund or credits for amounts paid under the GFB rate plan (1) if the amount of electricity actually used during the plan results in a billing amount under R-1 or GS-1 that is less than the amount for which you have been billed, or (2) for any power outages or other unavailability of service for any reason whatsoever.
- . These GFB terms apply only for electric service to the designated address. Under no circumstances can GFB terms determined on the basis of one address be transferred to another address.
- . Your GFB amount is based on the actual electricity used for the designated address over the past 12 months, as adjusted to reflect normal weather conditions and usage growth. The monthly GFB amount also includes a charge to cover financial, weather, and other risks. The above described adjustments and charges are subject to regulatory limitations, but may otherwise be increased or decreased by OG&E for any new contract period.
- . OG&E periodically reviews routes by which customers' meters are read to ensure they are in line with traffic patterns and efficiency goals. If your neighborhood is reviewed, the date on which your meter is read may change. Should this happen, you may see an adjustment in your GFB amount for the next billing period. This adjustment reflects only a change in the number of days in this billing period and you will continue to receive your GFB monthly rate after this adjusted billing.
- . OG&E offers the GFB plan pursuant to Standard Pricing Schedule R-GFB or GS-GFB, which is on file with the Oklahoma Corporation Commission effective 12-29-2005. These rates can also be viewed at oge.com.
- . If a customer's recorded usage includes a 3-month period in which actual usage exceeds expected usage by at least 30%, the company may at its discretion, return the customer to the standard tariff for the remaining months of the GFB contract.
- . Customers who participate in the GFB rate plan are not eligible for OG&E's wind power program.

To Whom It May Concern:

I was shocked and dismayed to read about your plan to charge customers an increased rate of 6.6% on our electric bills.

I have been a customer all of my life. I'm a 67 year old female - a Retired Registered Nurse. I come from a family that settled here since before statehood. We have all devoted our lives to Public Service. My father, Everett Stewart, served his country during WWII in the Pacific Theater. After that war ended he was elected Johnston County Sheriff for twenty-two years with a term with OSBI when Raymond Eury was Governor of OKLA. My mother, Georgia, was a Journeyman Welder at Marie's Dry Dock in Oakland, CA. building ships after Pearl Harbor. Both my brothers made careers in the Military. I became an RN in July 1974. I worked as Staff Relief RN in OKC and Tulsa in hospitals. When I came back home to Tishomingo I worked in our local hospital for ten years as the Night Supervisor for ten years. (career span 22 years)

As I'm sure you know these past two summers have been the hottest on record. At this point I live alone in a 370sq. ft. efficiency apartment I lease annually based on my income. My only asset is a 1997 Nissan automobile - currently being worked on by my son - a former Marine. I signed up for Smart Hours with your company last year. The price of groceries and medicine keep going up but my Social Security remains the same. I struggle to live from one pay day until the next. Reducing my access to air conditioning is not an option. Older people cannot survive the heat without A/C.

If you raise the cost of my energy use you will be negatively affect the quality of what time I have left to live.

In view of the facts that you have made record profits that are offshored to avoid taxes and you receive massive subsidies, it would obviously be more humane to request your shareholders pay this \$92.5 million.

Due to your fracking activities all over my state and the Deep Well Injection sites causing Oklahoma to be ground zero for frackquakes, this has and will continue to have negative consequences on our homes, businesses, and likely our water supplies. It is clear that you owe us for these damages

unless we have already passed the tipping point on global warming we need to divorce fossil fuels and switch to solar, wind, and thermal energy sources.

Step up to your responsibilities and pay for your \$92.5 million, you can afford it. And it is the moral thing to do.

Sincerely,

Mary Jane Cunningham

Oklahoma Corporation Commission
c/o Office of General Counsel
RE: OG&E Rate Case Comments

Dear Counsel,

I received a notice in my utility bill regarding a rate hike request for OG&E. As a customer of OG&E, I can tell you that they are, in my opinion, a great company. They work diligently to make repairs and keep consistent electric/energy to the population. With that said, if I am reading this bulletin right, they propose to increase their rates mostly to residential and small business while the PL and LPL's get a decrease or minimal rate change. I know that having friends in high places is beneficial to the recipient, but I got to tell you that I only get an average 2% raise once every year, usually 2 years. Now I am going to see an increase of app. \$7.22 to my electric bill which means I am looking at an additional \$86.64 per year, maybe more.

I live in an all-electric household, I would love to convert to some gas but that cost is way out of my reach. I just do not see where OG&E has not foreseen what they may expect in way of needs as they have the engineers and work force to stay on top of the issues and have a very decent cash flow set aside for any differences, expenses or changes that Oklahoma weather could throw at us.

I only see this rate hike as a way for the company to keep a fat nest egg and make the customer pay out more so they can keep their bank account well fed. I just had to replace my septic system, I did not have anyone to go to and say hey, give me more money for my infrastructure costs. Rather I had to dig into my own monies at a tune of \$7000 and get it replaced myself. I think they too should have to use their own money for the vague reasoning they are giving us, "increased business cost"?? "Electric infrastructure investments"?? Do they not already have an electric infrastructure? If I had to run electric to my home, guess who would pay for it????? ME!

I am sorry for the lengthy letter but I really believe that a fragile economy does not need to pay more for something the company already has. Didn't give them a hike last time for the same reasoning? Or very close to it and just as vague?? Help me, help the community and say no to any rate hike, please! Thank you.

Respectfully submitted,

Elizabeth Shepard

A handwritten signature in cursive script that reads "Elizabeth Shepard".

Dear Customer:

The Oklahoma Corporation Commission ("Commission") is scheduled to begin hearings on OG&E's request for a rate increase at 10:00 a.m., May 3, 2016, in Courtroom 301 on the third floor of the Jim Thorpe Building, 2101 North Lincoln Boulevard, Oklahoma City, Oklahoma 73105.

OG&E is seeking an annual increase of approximately \$92.5 million or 4.9 percent to recover increased business costs and electric infrastructure investments the Company has made since 2012.

The increase, as proposed by OG&E, would raise a residential customer's bill by 6.6 percent when compared to current rates. This equals about \$7.22 per month on the average residential customer bill. As proposed by OG&E, General Service customers would receive an average 12.6 percent rate increase. For the industrial rate classes the average increase would range from 5.4 percent for Power and Light customers (PL) to a decrease of 1.6 percent for Large Power and Light customers (LPL).

The hearing will be held each business day and continue until concluded. All interested parties may appear at the hearings to make public comments. After the hearing, the Commission will issue its final order and any rate changes will become effective after the final decision is issued.

For further information regarding the Application, you may contact OG&E at **1-800-272-9741**. In addition, you may visit the Commission's website at **www.occeweb.com** or send written comments addressed as follows:

I was surprised to find that rates depend on what kind of customer you are. Putting that aside, I was doubly surprised about the rate decrease of Large Power and Light customers (LPL). I'm having hard times with my money and I don't understand why I have to bear a higher burden than someone else. Are the improvements slanted that much towards my class? I wish I could pass along improvements/costs to those that will probably see little or no benefit.

Dear Ms. Hernandez,

I am very skeptical about OG&E's requested rate increase. Considering their near historic low costs for producing power for public utilities, why do they need an additional rate increase to recoup "increased business costs"?

Natural gas is at a 20 year low, and they are also paying drastically reduced rates for their transportation fuels. Isn't this enough, considering how many of their customers are dealing with layoffs from the oil and gas industry downturn?

Please do not support their requested rate increase.

Thank you.

Comment: I am writing in regards to OG&E's rate increase request. I reviewed their request and am puzzled why, if this is truly about infrastructure why the common citizen should be subsidizing large users of the utility companies as every individual and small business will see their rates increase while the largest users will actually receive a decrease. I also would like to know if any of the energy generated by OG&E is being sold out of state? If so are these customers also getting a rate increase or are they the ones getting the rate decrease on the backs of the hard working individuals of this state and the small business man? I see yet additional rate increases from OG&E until they either convert to natural gas or provide it as an alternative energy source for electricity.

[REDACTED]
([REDACTED] - [REDACTED] - [REDACTED])

I am writing to urge you to deny the rate request -
By their own admission it will increase rates to the
elderly by approx \$10⁰⁰/month for their residential use.

Secondly, I have attached a copy of one their own
files. As you can see, they are making plenty of
profit. They desire to be the big corporate donor of
things I rather have my own money & contribute to
charities of my choosing.

Current headlines show "Big Business" is a
poor moral partner - ie: Paypal, Disney, etc.

Hopefully your commission will decide in favor
of the people!

Subject: [NEWSENDER] - Against proposed OG&E rate increase - Message is from an unknown sender

Good day,

Please reject OG&E's request for a rate increase. In their flyer to consumers they state it would result in a 6.6% increase for homeowners.

We already pay a substantial average of \$233 per month for their service. That 6.6% increase would equate to a \$15.30 per month increase for us. **That's \$183.60 per year!!**

And, by the way, they are not the easiest company to deal with: We wanted to go on auto pay and they won't let you select a convenient same date per month close to their oddball "variable" due dates each month. Their 'excuse' is that they can't provide a set auto pay date due to variable service days in the month".

Why are other utilities, ONG, Cellular and Cable, Phone able to accommodate customers by permitting a convenient set due date each month? It's not rocket science.

We have auto pay with several other utilities and all were happy to accommodate our request for specific dates.....either related to pay periods, or social security payment dates.

We checked OG&E's 2015 annual profit - it was \$271.3 million. And considering they already cut personnel costs after installing smart meters, why would they need such a large rate increase?

In summary, please deny OG&E's rate increase request as we already pay more than enough.

Thank you very much,

Steve Grosvald

Dear Oklahoma Corporation Commission.

I am writing to express my concern for the rate increase proposed by OGE. As a senior citizen with limited income even a small increase would put a large burden on the average senior citizen. Our incomes continue to erode with the economy as we struggle with monthly expenses. It puzzles us all why a rate increase is necessary? The cost of fuel to produce electricity is historically low, yet we still get fuel surcharges on our monthly bills. More free wind power that is heavily subsidized is also used to make power that should REDUCE our electric cost.

This rate increase is not necessary and will burden many low income and retired people. Please vote NO increase.

Sincerely

Steve Kuntz

Oklahoma City, OK 73152-2000

Dear Commission Members'

I am writing in regards to the requested OG&E rate hike. I was unable to get answers from OG&E to the following questions:

How many rate increases have there been in the last nine years?

What was the percent of those rate increases?

What percent of salary increases have occurred in the last nine years?

What percent of increases have been given to stock holders during the last nine years?

I am a retired teacher of thirty-four years. I have had zero percent increase in my retirement in the last nine years. I have had no cost of living increase in medicare for the last three years. Why OG&E receive this requested 12.6 % rate increase in addition to others during this last nine years?

All government agencies within this state are experiencing huge funding percentage cuts. OG&E should not have increases until their salaries and stockholder payments zero out as have their customer's incomes.

Sincerely,

Jeanette Heitfeld

To Whom It May Concern:

I believe we should deny this rate increase. It is not the taxpayers responsibility to cover their business costs and infrastructure investments. OG&E has not provided us with any better product or service so why should we shell out more cash? They want an increase of 6.6% of our current bill, which is unrealistic and unfair.

Do NOT allow them to bully us into paying their debts.

Sincerely,

Jennifer Bray

Subject: [NEWSENDER] - Reject the OGandE plan for increased electric rates and fees - Message is from an unknown sender

Dear OCC Commissioner Dana Murphy,

Dear Commissioners,

Please protect Oklahoman families like mine from having to pay higher electric bills by rejecting the plan by OGandE to double the mandatory fee that residential customers like me must pay each month.

High mandatory fees take away customers' incentive to conserve energy or install home solar systems, and penalize those who have already done so. To make matters worse, OGandE wants to impose a "demand charge" on residential customers, which are confusing and could lead to major, unpredictable increases in our monthly bills. All of these changes are especially unfair to customers who use less electricity and will see the biggest increases in their bills.

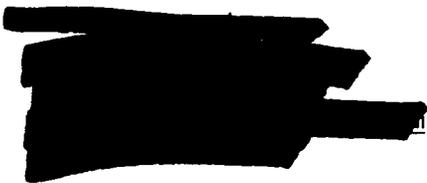

I am also asking you to reject OGandE's continued request to penalize customers who choose to go solar by subjecting them to high fixed charges and demand charges. Unlike cell phone or internet service providers, OGandE holds a monopoly on electric sales in its territory here in Oklahoma and we have no choice but to buy electricity from them subject to whatever fees and rates they impose. In that light, it is completely inappropriate for OGandE to impose high mandatory fees on families that install solar panels on their own homes to reduce the electricity they buy off the grid.

It simply doesn't make sense to have families and businesses pay more to OGandE when they use less electricity. All Oklahomans benefit when customers reduce their energy use through conservation or solar systems, and OGandE's rates should not be sending an "all you can eat" signal.

I am asking you to please reject the OGandE plan to impose high mandatory fees and demand charges on residential customers and small businesses. Taking away customers' control over their bills is unfair to all customers and especially so to customers who choose to reduce their energy use or spend their own money to install solar panels on their homes.

Thank you.

Sincerely,

Dear Vice Chairman Murphy,

OG&E's proposal in this docket is anti-solar and would saddle customers with unjustified fixed charges and demand charges.

Even OG&E's own study shows there is no need to charge solar customers more. It says that solar customers are paying more than their fair share. Also, the Attorney General of Oklahoma and the OCC staff have both advocated against demand charges.

Not only is this proposal wasting Oklahomans' money, it is another utility attempt to stop energy choice and competition for all residential customers.

Dear OCC Commissioner Dana Murphy,

Dear Commissioners,

Please protect Oklahoman families like mine from having to pay higher electric bills by rejecting the plan by OGandE to double the mandatory fee that residential customers like me must pay each month.

High mandatory fees take away customers' incentive to conserve energy or install home solar systems, and penalize those who have already done so. To make matters worse, OGandE wants to impose a "demand charge" on residential customers, which are confusing and could lead to major, unpredictable increases in our monthly bills. All of these changes are especially unfair to customers who use less electricity and will see the biggest increases in their bills.

I am also asking you to reject OGandE's continued request to penalize customers who choose to go solar by subjecting them to high fixed charges and demand charges. Unlike cell phone or internet service providers, OGandE holds a monopoly on electric sales in its territory here in Oklahoma and we have no choice but to buy electricity from them subject to whatever fees and rates they impose. In that light, it is completely inappropriate for OGandE to impose high mandatory fees on families that install solar panels on their own homes to reduce the electricity they buy off the grid.

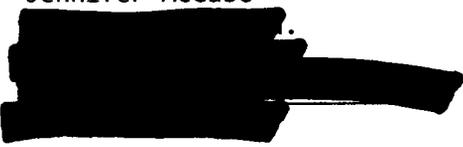

It simply doesn't make sense to have families and businesses pay more to OGandE when they use less electricity. All Oklahomans benefit when customers reduce their energy use through conservation or solar systems, and OGandE's rates should not be sending an "all you can eat" signal.

I am asking you to please reject the OGandE plan to impose high mandatory fees and demand charges on residential customers and small businesses. Taking away customers' control over their bills is unfair to all customers and especially so to customers who choose to reduce their energy use or spend their own money to install solar panels on their homes.

Thank you.

Sincerely,

Jennifer McCabe

Subject: [NEWSENDER] - Oklahoma ratepayers want energy choice! - Message is from an unknown sender

Dear Vice Chairman Murphy,

OG&E's proposal in this docket is anti-solar and would saddle customers with unjustified fixed charges and demand charges.

Even OG&E's own study shows there is no need to charge solar customers more. It says that solar customers are paying more than their fair share. Also, the Attorney General of Oklahoma and the OCC staff have both advocated against demand charges.

Not only is this proposal wasting Oklahomans' money, it is another utility attempt to stop energy choice and competition for all residential customers.

Dear OCC Commissioner Dana Murphy,

Dear Commissioners,

The effort to charge more to customers who use solar energy is crazy and takes a step back for Oklahoma while most other state are running forward! Why do they promote wind energy, but not solar? Because they can charge for it! It is obvious OGandE is more interested in profits than taking care of customers and the environment. Form letter below, but good points that I support.....

OGandE wants to impose a "demand charge" on residential customers, which are confusing and could lead to major, unpredictable increases in our monthly bills. All of these changes are especially unfair to customers who use less electricity and will see the biggest increases in their bills.

I am also asking you to reject OGandE's continued request to penalize customers who choose to go solar by subjecting them to high fixed charges and demand charges. It simply doesn't make sense to have families and businesses pay more to OGandE when they use less electricity. All Oklahomans benefit when customers reduce their energy use through conservation or solar systems, and OGandE's rates should not be sending an "all you can eat" signal.

I am asking you to please reject the OGandE plan to impose high mandatory fees and demand charges on residential customers and small businesses. Taking away customers' control over their bills is unfair to all customers and especially so to customers who choose to reduce their energy use or spend their own money to install solar panels on their homes.

Thank you.

Sincerely,

W H Vander Haar

Subject: [NEWSENDER] - Reject the OGandE plan for increased electric rates and fees - Message is from an unknown sender

Dear OCC Commissioner Dana Murphy,

Dear Commissioners,

Please protect Oklahoman families like mine from having to pay higher electric bills by rejecting the plan by OGandE to double the mandatory fee that residential customers like me must pay each month.

High mandatory fees take away customers' incentive to conserve energy or install home solar systems, and penalize those who have already done so. To make matters worse, OGandE wants to impose a "demand charge" on residential customers, which are confusing and could lead to major, unpredictable increases in our monthly bills. All of these changes are especially unfair to customers who use less electricity and will see the biggest increases in their bills.

I am also asking you to reject OGandE's continued request to penalize customers who choose to go solar by subjecting them to high fixed charges and demand charges. Unlike cell phone or internet service providers, OGandE holds a monopoly on electric sales in its territory here in Oklahoma and we have no choice but to buy electricity from them subject to whatever fees and rates they impose. In that light, it is completely inappropriate for OGandE to impose high mandatory fees on families that install solar panels on their own homes to reduce the electricity they buy off the grid.

It simply doesn't make sense to have families and businesses pay more to OGandE when they use less electricity. All Oklahomans benefit when customers reduce their energy use through conservation or solar systems, and OGandE's rates should not be sending an "all you can eat" signal.

I am asking you to please reject the OGandE plan to impose high mandatory fees and demand charges on residential customers and small businesses. Taking away customers' control over their bills is unfair to all customers and especially so to customers who choose to reduce their energy use or spend their own money to install solar panels on their homes.

Thank you.

Sincerely,

Linda Gill

Dear OCC Commissioner Dana Murphy,

Dear Commissioners,

Please stop this greediness and or irresponsible lack of budgeting. OGandE needs to use common sense and run their business by utilizing the golden rule. Also the old platitude "walk a mile in my shoes before you raise my rates", ;) not quite like that but truly being on fixed income this would cause us to choose between cooling and eating, \$ 3.00 for a bag of lettuce and so on, groceries and just everything is so high when you are receiving such a low social security and no other income. Thank you for your time and consideration.

Please protect Oklahoman families like mine from having to pay higher electric bills by rejecting the plan by OGandE to double the mandatory fee that residential customers like me must pay each month.

Dear OCC Commissioner Dana Murphy,

Dear Commissioners,

Please protect Oklahoman families like mine from having to pay higher electric bills by rejecting the plan by OGandE to double the mandatory fee that residential customers like me must pay each month.

High mandatory fees take away customers' incentive to conserve energy or install home solar systems, and penalize those who have already done so. To make matters worse, OGandE wants to impose a "demand charge" on residential customers, which are confusing and could lead to major, unpredictable increases in our monthly bills. All of these changes are especially unfair to customers who use less electricity and will see the biggest increases in their bills.

I am also asking you to reject OGandE's continued request to penalize customers who choose to go solar by subjecting them to high fixed charges and demand charges. Unlike cell phone or internet service providers, OGandE holds a monopoly on electric sales in its territory here in Oklahoma and we have no choice but to buy electricity from them subject to whatever fees and rates they impose. In that light, it is completely inappropriate for OGandE to impose high mandatory fees on families that install solar panels on their own homes to reduce the electricity they buy off the grid.

It simply doesn't make sense to have families and businesses pay more to OGandE when they use less electricity. All Oklahomans benefit when customers reduce their energy use through conservation or solar systems, and OGandE's rates should not be sending an "all you can eat" signal.

I am asking you to please reject the OGandE plan to impose high mandatory fees and demand charges on residential customers and small businesses. Taking away customers' control over their bills is unfair to all customers and especially so to customers who choose to reduce their energy use or spend their own money to install solar panels on their homes.

Thank you.

Sincerely,

Karla Hinton

In that light, it is completely inappropriate for OGandE to impose high mandatory fees on families that install solar panels on their own homes to reduce the electricity they buy off the grid.

It simply doesn't make sense to have families and businesses pay more to OGandE when they use less electricity. All Oklahomans benefit when customers reduce their energy use through conservation or solar systems, and OGandE's rates should not be sending an "all you can eat" signal.

I am asking you to please reject the OGandE plan to impose high mandatory fees and demand charges on residential customers and small businesses. Taking away customers' control over their bills is unfair to all customers and especially so to customers who choose to reduce their energy use or spend their own money to install solar panels on their homes.

Thank you.

Sincerely,

Mary Beth Park

Subject: [NEWSENDER] - Reject the OGandE plan for increased electric rates and fees - Message is from an unknown sender

Dear OCC Commissioner Dana Murphy,

Dear Commissioners,

Please protect Oklahoman families like mine from having to pay higher electric bills by rejecting the plan by OGandE to double the mandatory fee that residential customers like me must pay each month.

High mandatory fees take away customers' incentive to conserve energy or install home solar systems, and penalize those who have already done so. To make matters worse, OGandE wants to impose a "demand charge" on residential customers, which are confusing and could lead to major, unpredictable increases in our monthly bills. All of these changes are especially unfair to customers who use less electricity and will see the biggest increases in their bills.

I am also asking you to reject OGandE's continued request to penalize customers who choose to go solar by subjecting them to high fixed charges and demand charges. Unlike cell phone or internet service providers, OGandE holds a monopoly on electric sales in its territory here in Oklahoma and we have no choice but to buy electricity from them subject to whatever fees and rates they impose. In that light, it is completely inappropriate for OGandE to impose high mandatory fees on families that install solar panels on their own homes to reduce the electricity they buy off the grid.

It simply doesn't make sense to have families and businesses pay more to OGandE when they use less electricity. All Oklahomans benefit when customers reduce their energy use through conservation or solar systems, and OGandE's rates should not be sending an "all you can eat" signal.

Subject: Oklahoma ratepayers want energy choice!

Dear Vice Chairman Murphy,

OG&E's proposal in this docket is anti-solar and would saddle customers with unjustified fixed charges and demand charges.

Even OG&E's own study shows there is no need to charge solar customers more. It says that solar customers are paying more than their fair share. Also, the Attorney General of Oklahoma and the OCC staff have both advocated against demand charges.

Not only is this proposal wasting Oklahomans' money, it is another utility attempt to stop energy choice and competition for all residential customers.
